7.44	/var/www/galleria/data/site/mvc/model/browsemodel.php File Reference . . . . .	184
7.45	/var/www/galleria/data/site/mvc/model/imagesmodel.php File Reference . . . . .	185
7.46	/var/www/galleria/data/site/mvc/model/indexmodel.php File Reference . . . . .	186
7.47	/var/www/galleria/data/site/mvc/model/jsonmodel.php File Reference . . . . .	187
7.48	/var/www/galleria/data/site/mvc/model/profilemodel.php File Reference . . . . .	188
7.49	/var/www/galleria/data/site/mvc/model/searchmodel.php File Reference . . . . .	189
7.50	/var/www/galleria/data/site/mvc/model/tagmodel.php File Reference . . . . .	190

# Chapter 1

## Kuvagalleria Namespace Index

### 1.1 Kuvagalleria Package List

Here are the packages with brief descriptions (if available):

<b>data</b>	.....	9
<b>lib</b>	.....	11
<b>mvc</b>	.....	17

## Chapter 2

# Kuvagalleria Hierarchical Index

### 2.1 Kuvagalleria Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Galleria_Auth . . . . .	35
Galleria_Auth_Object . . . . .	41
Galleria_Auto_Configure . . . . .	45
Galleria_Auto_Load . . . . .	47
Galleria_Configuration . . . . .	48
Galleria_Configuration_Object . . . . .	50
Galleria_Controller . . . . .	52
AdminController . . . . .	21
BrowseController . . . . .	30
ErrorController . . . . .	34
HelpController . . . . .	102
ImagesController . . . . .	103
IndexController . . . . .	108
JsonController . . . . .	111
LoginController . . . . .	128
ProfileController . . . . .	130
SearchController . . . . .	134
TagController . . . . .	136
Galleria_Database . . . . .	57
Galleria_Database_Pdo . . . . .	58
Galleria_Element_Category . . . . .	59
Galleria_Image . . . . .	66
Galleria_Image_Object . . . . .	69
Galleria_Model . . . . .	72
Galleria_Auth_Model . . . . .	38
Galleria_Model_Collection . . . . .	75
AdminModel . . . . .	26
BrowseModel . . . . .	31
ImagesModel . . . . .	105
IndexModel . . . . .	109
JsonModel . . . . .	114
ProfileModel . . . . .	132
SearchModel . . . . .	135

TagModel . . . . .	137
Galleria_Requests . . . . .	79
Galleria_Requests_Gets . . . . .	81
Galleria_Requests_Posts . . . . .	83
Galleria_Session . . . . .	85
Galleria_Site . . . . .	87
Galleria_View . . . . .	90
Galleria_Viewelement . . . . .	101
Galleria_View_Categories . . . . .	93
Galleria_View_Pictures . . . . .	95
Galleria_View_Stats . . . . .	97
Galleria_View_Tags . . . . .	99

## Chapter 3

# Kuvagalleria Class Index

### 3.1 Kuvagalleria Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<b>AdminController</b> . . . . .	21
<b>AdminModel</b> . . . . .	26
<b>BrowseController</b> . . . . .	30
<b>BrowseModel</b> . . . . .	31
<b>ErrorController</b> . . . . .	34
<b>Galleria_Auth</b> . . . . .	35
<b>Galleria_Auth_Model</b> . . . . .	38
<b>Galleria_Auth_Object</b> . . . . .	41
<b>Galleria_Auto_Configure</b> . . . . .	45
<b>Galleria_Auto_Load</b> . . . . .	47
<b>Galleria_Configuration</b> . . . . .	48
<b>Galleria_Configuration_Object</b> . . . . .	50
<b>Galleria_Controller</b> . . . . .	52
<b>Galleria_Database</b> . . . . .	57
<b>Galleria_Database_Pdo</b> . . . . .	58
<b>Galleria_Element_Category</b> . . . . .	59
<b>Galleria_Image</b> . . . . .	66
<b>Galleria_Image_Object</b> . . . . .	69
<b>Galleria_Model</b> . . . . .	72
<b>Galleria_Model_Collection</b> . . . . .	75
<b>Galleria_Requests</b> . . . . .	79
<b>Galleria_Requests_Gets</b> . . . . .	81
<b>Galleria_Requests_Posts</b> . . . . .	83
<b>Galleria_Session</b> . . . . .	85
<b>Galleria_Site</b> . . . . .	87
<b>Galleria_View</b> . . . . .	90
<b>Galleria_View_Categories</b> . . . . .	93
<b>Galleria_View_Pictures</b> . . . . .	95
<b>Galleria_View_Stats</b> . . . . .	97
<b>Galleria_View_Tags</b> . . . . .	99
<b>Galleria_Viewelement</b> . . . . .	101
<b>HelpController</b> . . . . .	102
<b>ImagesController</b> . . . . .	103

<b>ImagesModel</b>	105
<b>IndexController</b>	108
<b>IndexModel</b>	109
<b>JsonController</b>	111
<b>JsonModel</b>	114
<b>LoginController</b>	128
<b>ProfileController</b>	130
<b>ProfileModel</b>	132
<b>SearchController</b>	134
<b>SearchModel</b>	135
<b>TagController</b>	136
<b>TagModel</b>	137

## Chapter 4

# Kuvagalleria File Index

### 4.1 Kuvagalleria File List

Here is a list of all files with brief descriptions:

/var/www/galleria/data/bootstrap.php . . . . .	139
/var/www/galleria/data/config/database.dist.php . . . . .	142
/var/www/galleria/data/config/database.php . . . . .	143
/var/www/galleria/data/config/site.dist.php . . . . .	145
/var/www/galleria/data/html/index.php . . . . .	146
/var/www/galleria/data/lib/auth.php . . . . .	147
/var/www/galleria/data/lib/configuration.php . . . . .	155
/var/www/galleria/data/lib/controller.php . . . . .	156
/var/www/galleria/data/lib/database.php . . . . .	144
/var/www/galleria/data/lib/image.php . . . . .	159
/var/www/galleria/data/lib/model.php . . . . .	149
/var/www/galleria/data/lib/requests.php . . . . .	161
/var/www/galleria/data/lib/session.php . . . . .	164
/var/www/galleria/data/lib/site.php . . . . .	165
/var/www/galleria/data/lib/view.php . . . . .	166
/var/www/galleria/data/lib/viewelement.php . . . . .	171
/var/www/galleria/data/lib/auth/model.php . . . . .	148
/var/www/galleria/data/lib/auth/object.php . . . . .	150
/var/www/galleria/data/lib/auto/configure.php . . . . .	153
/var/www/galleria/data/lib/auto/load.php . . . . .	154
/var/www/galleria/data/lib/configuration/object.php . . . . .	151
/var/www/galleria/data/lib/database/pdo.php . . . . .	157
/var/www/galleria/data/lib/element/category.php . . . . .	158
/var/www/galleria/data/lib/image/object.php . . . . .	152
/var/www/galleria/data/lib/model/collection.php . . . . .	160
/var/www/galleria/data/lib/requests/gets.php . . . . .	162
/var/www/galleria/data/lib/requests/posts.php . . . . .	163
/var/www/galleria/data/lib/view/categories.php . . . . .	167
/var/www/galleria/data/lib/view/pictures.php . . . . .	168
/var/www/galleria/data/lib/view/stats.php . . . . .	169
/var/www/galleria/data/lib/view/tags.php . . . . .	170
/var/www/galleria/data/site/mvc/controller/admincontroller.php . . . . .	172
/var/www/galleria/data/site/mvc/controller/browsecontroller.php . . . . .	173

/var/www/galleria/data/site/mvc/controller/ <b>errorcontroller.php</b>	174
/var/www/galleria/data/site/mvc/controller/ <b>helpcontroller.php</b>	175
/var/www/galleria/data/site/mvc/controller/ <b>imagescontroller.php</b>	176
/var/www/galleria/data/site/mvc/controller/ <b>indexcontroller.php</b>	177
/var/www/galleria/data/site/mvc/controller/ <b>jsoncontroller.php</b>	178
/var/www/galleria/data/site/mvc/controller/ <b>logincontroller.php</b>	179
/var/www/galleria/data/site/mvc/controller/ <b>profilecontroller.php</b>	180
/var/www/galleria/data/site/mvc/controller/ <b>searchcontroller.php</b>	181
/var/www/galleria/data/site/mvc/controller/ <b>tagcontroller.php</b>	182
/var/www/galleria/data/site/mvc/model/ <b>adminmodel.php</b>	183
/var/www/galleria/data/site/mvc/model/ <b>browsemodel.php</b>	184
/var/www/galleria/data/site/mvc/model/ <b>imagesmodel.php</b>	185
/var/www/galleria/data/site/mvc/model/ <b>indexmodel.php</b>	186
/var/www/galleria/data/site/mvc/model/ <b>jsonmodel.php</b>	187
/var/www/galleria/data/site/mvc/model/ <b>profilemodel.php</b>	188
/var/www/galleria/data/site/mvc/model/ <b>searchmodel.php</b>	189
/var/www/galleria/data/site/mvc/model/ <b>tagmodel.php</b>	190

## Chapter 5

# Kuvagalleria Namespace Documentation

### 5.1 Package data

#### 5.1.1 Detailed Description

Bootstrap, file that really launch everything.

This file really do everything, including configuring and page viewing.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Distributed database configurations.

This file contains the distributed database configurations, which should be copy to local one and it should be modified with correct values.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

config

Distributed site configurations.

This file contains the distributed site configurations, which should be copy to local one and it should be modified with correct values.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

config

The index of page.

This file catches all page requests and redirect them to bootstrap.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

html

## 5.2 Package lib

### 5.2.1 Detailed Description

Auth Model file.

This file contains **Galleria\_Auth\_Model** (p. 38) class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

auth

Auth Object file.

This file contains **Galleria\_Auth\_Object** (p. 41) class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Auth file.

This file contains **Galleria\_Auth** (p. 35) class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Auto configure class file.

This file contains **Galleria\_Auto\_Configure** (p. 45) class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

auto

Auto load class file.

This file contains **Galleria\_Auto\_Load** (p. 47) class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Configuration object class file.

This file contains Configuration object class file.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

configuration

Configuration class file.

This file contains Configuration class file.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Controller class file

This file contains Controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

controller

Database PDO class file

This file contains Database PDO class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

database

Database class file

This file contains Database class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

Category element class file

This file contains Category element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

element

Image object class file

This file contains Image object class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

image

Image class file

This file contains Image class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Galleria Model Collection class.

File contains Galleria Model Collection.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

model

File for Galleria Model class.

File contains Galleria Model.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Galleria Requests Gets class.

File contains Galleria Requests Gets.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

requests

File for Galleria Requests Posts class.

File contains Galleria Requests Posts.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Galleria Requests class.

File contains Galleria Requests.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Sessions class.

This file contains Session class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

session

File for Site class.

This file contains Site class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

site

File for Categories view element class.

This file contains Categories view element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

view

File for Pictures view element class.

This file contains Pictures view element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Stats view element class.

This file contains stats view element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Tags view element class.

This file contains Tags view element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for View class.

This file contains View class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for View element class.

This file contains View element class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

## 5.3 Package mvc

### 5.3.1 Detailed Description

File for Admin controller class.

This file contains admin controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

controller

File for Browse controller class.

This file contains Browse controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Error controller class.

This file contains error controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Help controller class.

This file contains Help controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Images controller class.

This file contains Images controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Index controller class.

This file contains Index controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Json controller class.

This file contains Json controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Login controller class.

This file contains Login controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Profile controller class.

This file contains Profile controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

File for Search controller class.

This file contains Search controller class.

**Author:**

Sami Saada <saada@cs.helsinki.fi>

**Version:**

0.1

## Chapter 6

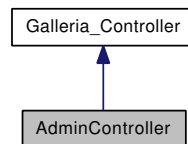

# Kuvagalleria Class Documentation

### 6.1 AdminController Class Reference

Inheritance diagram for AdminController:

Collaboration diagram for AdminController:

#### Public Member Functions

- **indexAction ()**
- **usercontrolAction ()**
- **picturecontrolAction ()**
- **before ()**

#### Protected Member Functions

- **\_modifyUsers (\$users, \$groups)**
- **\_modifyGroups (\$gid, \$groups)**
- **\_insertPicture (\$picdata)**
- **\_imageInfo (\$file)**

### 6.1.1 Detailed Description

Definition at line 19 of file admincontroller.php.

### 6.1.2 Member Function Documentation

#### 6.1.2.1 AdminController.indexAction ()

Index page.

Index page action. Sets up Admin index page. public

Definition at line 28 of file admincontroller.php.

#### 6.1.2.2 AdminController.usercontrolAction ()

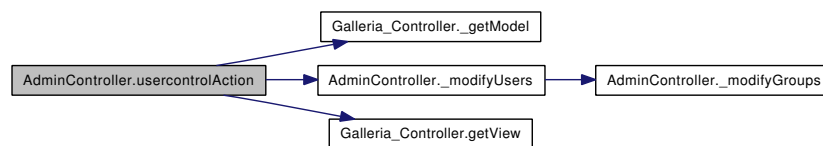

User control page.

This page handles all user and group related functionality. public

Definition at line 38 of file admincontroller.php.

References Galleria\_Controller.\_getModel(), \_modifyUsers(), and Galleria\_Controller.getView().

Here is the call graph for this function:

#### 6.1.2.3 AdminController.picturecontrolAction ()

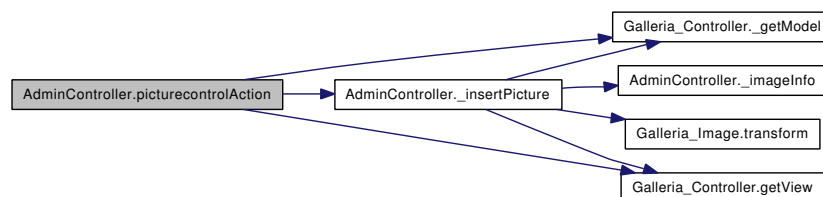

Picture control page.

This function handles inserted pictures. public

Definition at line 68 of file admincontroller.php.

References Galleria\_Controller.\_getModel(), \_insertPicture(), and Galleria\_Controller.getView().

Here is the call graph for this function:

**6.1.2.4 AdminController.before ()**

Do these before.

This function checks if user has right to be in these pages. public

**Returns:**

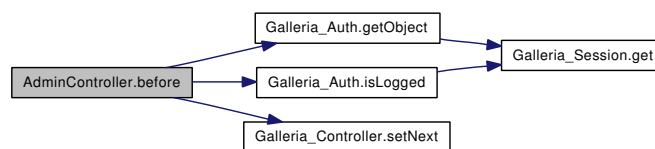

boolean

Reimplemented from **Galleria\_Controller** (p. 54).

Definition at line 84 of file admincontroller.php.

References **Galleria\_Auth.getObject()**, **Galleria\_Auth.isLogged()**, and **Galleria\_Controller.setNext()**.

Here is the call graph for this function:

**6.1.2.5 AdminController.\_modifyUsers (\$ users, \$ groups) [protected]**

Modify users.

This function formats users. private

**Parameters:**

**array** \$users

**array** \$groups

**Returns:**

array

Definition at line 104 of file admincontroller.php.

References **\_modifyGroups()**.

Referenced by **usercontrolAction()**.

Here is the call graph for this function:

**6.1.2.6 AdminController.\_modifyGroups (\$ gid, \$ groups) [protected]**

Modifies groups.

This function formats groups. private

**Parameters:**

*integer* \$gid  
*array* \$groups

**Returns:**

stdClass

Definition at line 138 of file admincontroller.php.

Referenced by \_modifyUsers().

**6.1.2.7 AdminController.\_insertPicture (\$picdata) [protected]**

Insert picture.

This function inserts picture into tmp file. private

**Parameters:**

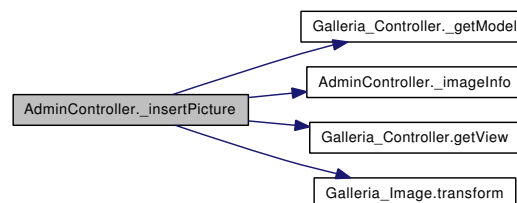

*array* \$picdata PATH\_DATA\_SITE\_IMAGES

Definition at line 159 of file admincontroller.php.

References Galleria\_Controller.\_getModel(), \_imageInfo(), Galleria\_Controller.getView(), and Galleria\_Image.transform().

Referenced by picturecontrolAction().

Here is the call graph for this function:

**6.1.2.8 AdminController.\_imageInfo (\$file) [protected]**

Gives image information.

This function gives information about specific image. private

**Parameters:**

*string* \$file

**Returns:**

stdClass

Definition at line 184 of file admincontroller.php.

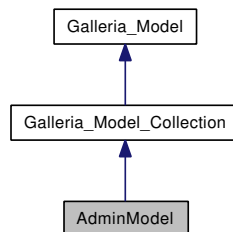

Referenced by \_insertPicture().

The documentation for this class was generated from the following file:

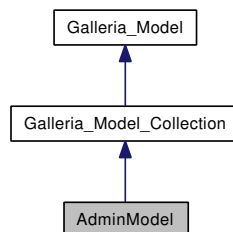

- `/var/www/galleria/data/site/mvc/controller/admincontroller.php`

## 6.2 AdminModel Class Reference

Inheritance diagram for AdminModel:

Collaboration diagram for AdminModel:

### Public Member Functions

- **getGroups ()**
- **getUsers ()**
- **addNewUser (\$name, \$user, \$pass)**
- **addNewGroup (\$name, \$admin)**
- **addPicture (\$pg, \$year, \$desc)**
- **getPics ()**

#### 6.2.1 Detailed Description

Definition at line 19 of file adminmodel.php.

### 6.2.2 Member Function Documentation

#### 6.2.2.1 AdminModel.getGroups ()

Give groups.

This function returns groups. public

**Returns:**

array

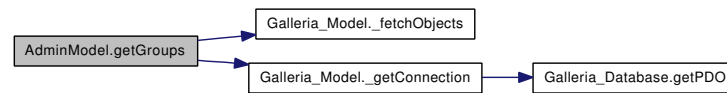

Reimplemented from **Galleria\_Model\_Collection** (p. 77).

Definition at line 29 of file adminmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.2.2.2 AdminModel.getUsers ()

Give users.

This function returns users. public

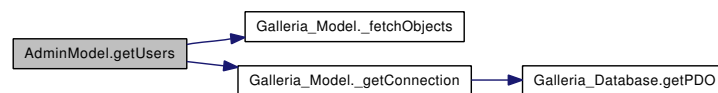

#### Returns:

array

Definition at line 44 of file adminmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.2.2.3 AdminModel.addNewUser (\$ name, \$ user, \$ pass)

Add new user.

This function adds new user. public

#### Parameters:

*string* \$name

*string* \$user

*string* \$pass

#### Returns:

stdClass

Definition at line 62 of file adminmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.2.2.4 AdminModel.addNewGroup (\$ name, \$ admin)

Add new group.

This function adds new group. public

##### Parameters:

*string* \$name

*boolean* \$admin

##### Returns:

stdClass

Definition at line 79 of file adminmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.2.2.5 AdminModel.addPicture (\$ pg, \$ year, \$ desc)

Add new picture.

This function add new picture. public

##### Parameters:

*string* \$pg

*string* \$year

*string* \$desc

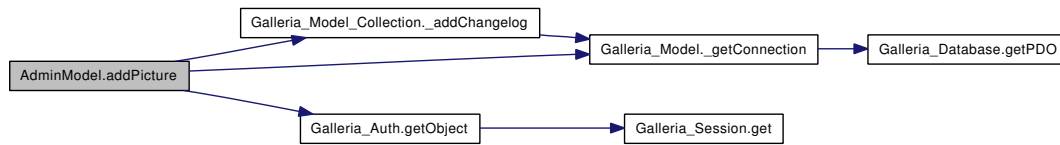

##### Returns:

boolean

Definition at line 100 of file adminmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), Galleria\_Model.\_getConnection(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

#### 6.2.2.6 AdminModel.getPics ()

Give pictures.

This function returns pictures, which are not in a group nor shown. public

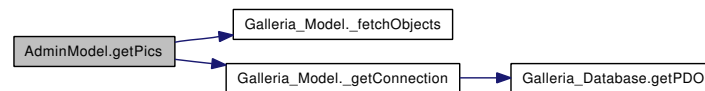

##### Returns:

array

Definition at line 114 of file `adminmodel.php`.

References `Galleria_Model._fetchObjects()`, and `Galleria_Model._getConnection()`.

Here is the call graph for this function:

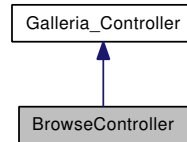

The documentation for this class was generated from the following file:

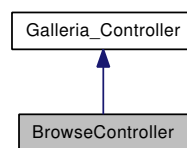

- `/var/www/galleria/data/site/mvc/model/adminmodel.php`

## 6.3 BrowseController Class Reference

Inheritance diagram for BrowseController:

Collaboration diagram for BrowseController:

### Public Member Functions

- `indexAction ()`

#### 6.3.1 Detailed Description

Definition at line 19 of file `browsecontroller.php`.

#### 6.3.2 Member Function Documentation

##### 6.3.2.1 BrowseController.indexAction ()

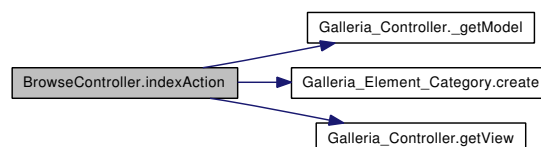

Index page.

Index page action. Sets up Browse index page. public

Definition at line 28 of file `browsecontroller.php`.

References `Galleria_Controller._getModel()`, `Galleria_Element_Category.create()`, and `Galleria_Controller.getView()`.

Here is the call graph for this function:

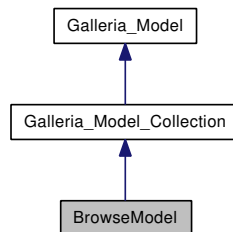

The documentation for this class was generated from the following file:

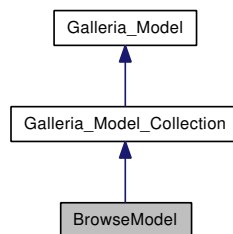

- `/var/www/galleria/data/site/mvc/controller/browsecontroller.php`

## 6.4 BrowseModel Class Reference

Inheritance diagram for BrowseModel:

Collaboration diagram for BrowseModel:

### Public Member Functions

- `getPictures ($cid)`
- `getCategories ()`
- `getCatName ($id)`

#### 6.4.1 Detailed Description

Definition at line 19 of file `browsemodel.php`.

#### 6.4.2 Member Function Documentation

##### 6.4.2.1 BrowseModel.getPictures (\$ cid)

Gets pictures.

This function gets pictures **data** (p. 9) from database. public

##### Parameters:

*integer* \$cid

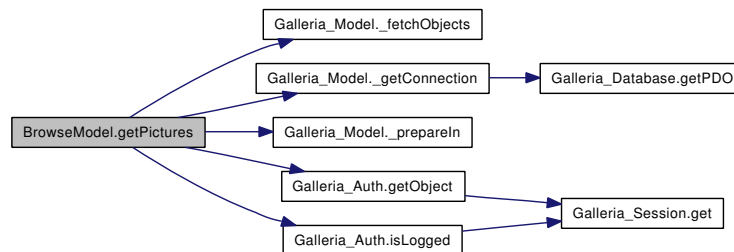

##### Returns:

array

Definition at line 30 of file browsemodel.php.

References Galleria\_Model.\_fetchObjects(), Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

#### 6.4.2.2 BrowseModel.getCategories ()

Gets categories.

This function get categories **data** (p. 9) from database. public

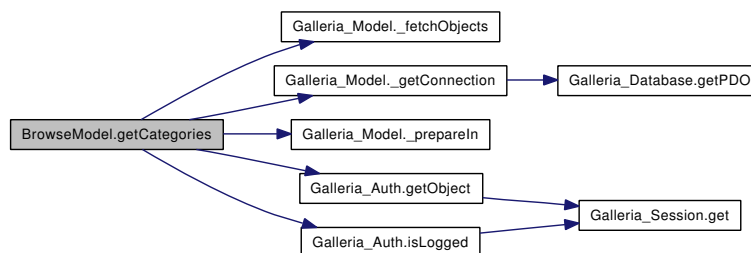

##### Returns:

array

Definition at line 55 of file browsemodel.php.

References Galleria\_Model.\_fetchObjects(), Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

#### 6.4.2.3 BrowseModel.getCatName (\$id)

Gets name of category.

This function gets name of specified category from database. public

##### Parameters:

*integer* \$id

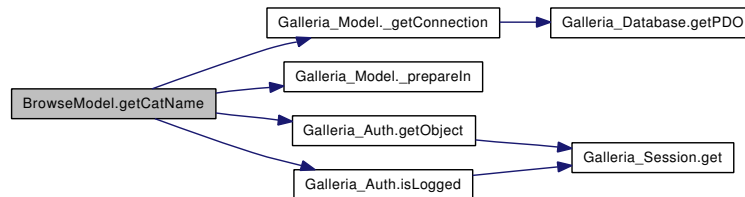

**Returns:**

string

Definition at line 82 of file browsemodel.php.

References Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

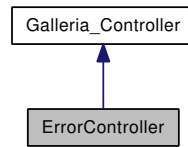

The documentation for this class was generated from the following file:

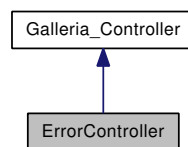

- `/var/www/galleria/data/site/mvc/model/browsemodel.php`

## 6.5 ErrorController Class Reference

Inheritance diagram for ErrorController:

Collaboration diagram for ErrorController:

### Public Member Functions

- `pagenotfoundAction ()`

#### 6.5.1 Detailed Description

Definition at line 19 of file `errorcontroller.php`.

#### 6.5.2 Member Function Documentation

##### 6.5.2.1 ErrorController.pagenotfoundAction ()

Error 404 page.

This assigns page not found error page. public

Definition at line 28 of file `errorcontroller.php`.

The documentation for this class was generated from the following file:

- `/var/www/galleria/data/site/mvc/controller/errorcontroller.php`

## 6.6 Galleria\_Auth Class Reference

### Static Public Member Functions

- static **tryLog** (\$username, \$password)
- static **isLogged** ()
- static **getObject** ()
- static **logOut** ()
- static **init** ()

#### 6.6.1 Detailed Description

Definition at line 19 of file auth.php.

#### 6.6.2 Member Function Documentation

##### 6.6.2.1 static Galleria\_Auth.tryLog (\$ username, \$ password) [static]

The logging function.

This is the function, which should be used on logging in. public

##### Parameters:

*string* \$username  
*string* \$password

Definition at line 31 of file auth.php.

References Galleria\_Session.set().

Here is the call graph for this function:

##### 6.6.2.2 static Galleria\_Auth.isLogged () [static]

Checks if already logged in.

This function checks if user is already logged in and returns the information. public

##### Returns:

boolean

Definition at line 50 of file auth.php.

References Galleria\_Session.get().

Referenced by ProfileController.before(), LoginController.before(), AdminController.before(), ImagesModel.checkPermission(), JsonController.getAction(), BrowseModel.getCategories(),

BrowseModel.getCatName(), ImagesModel.getImageInfo(), IndexModel.getLatestPictures(), TagModel.getPics(), BrowseModel.getPictures(), Galleria\_Model\_Collection.getSearchPictures(), IndexModel.getStats(), Galleria\_Model\_Collection.getTags(), Galleria\_View\_Tags.lists(), and JsonController.postAction().

Here is the call graph for this function:

### 6.6.2.3 static Galleria\_Auth.getObject () [static]

Gives auth object.

This function returns auth object. public

#### Returns:

**Galleria\_Auth\_Object** (p. 41)

Definition at line 64 of file auth.php.

References Galleria\_Session.get().

Referenced by AdminModel.addPicture(), JsonModel.addTag(), AdminController.before(), JsonModel.changeCat(), JsonModel.changeDesc(), JsonModel.changePg(), JsonModel.changeYear(), ImagesModel.checkPermission(), JsonModel.deletePicTag(), JsonController.getAction(), BrowseModel.getCategories(), BrowseModel.getCatName(), ImagesModel.getImageInfo(), IndexModel.getLatestPictures(), TagModel.getPics(), BrowseModel.getPictures(), Galleria\_Model\_Collection.getSearchPictures(), IndexModel.getStats(), Galleria\_Model\_Collection.getTags(), ProfileController.indexAction(), Galleria\_View\_Tags.lists(), JsonModel.pictureVisibility(), and JsonController.postAction().

Here is the call graph for this function:

### 6.6.2.4 static Galleria\_Auth.logout () [static]

Logs out.

This function logs out by deleting auth object from session. public

Definition at line 76 of file auth.php.

References Galleria\_Session.del().

Referenced by LoginController.outAction().

Here is the call graph for this function:

### 6.6.2.5 static Galleria\_Auth.init () [static]

Initialize auth object.

This function gets new information for auth object and updates it. public

Definition at line 88 of file auth.php.

References Galleria\_Session.set().

Here is the call graph for this function:

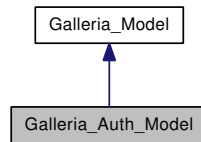

The documentation for this class was generated from the following file:

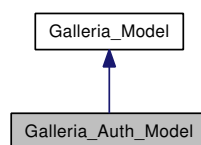

- `/var/www/galleria/data/lib/auth.php`

## 6.7 Galleria\_Auth\_Model Class Reference

Inheritance diagram for Galleria\_Auth\_Model:

Collaboration diagram for Galleria\_Auth\_Model:

### Public Member Functions

- **logIn** (\$uname, \$pword)
- **getData** (\$object)

### Protected Member Functions

- **\_getUserData** (\$username, \$password)
- **\_getGroups** (\$userid)

#### 6.7.1 Detailed Description

Definition at line 19 of file model.php.

#### 6.7.2 Member Function Documentation

##### 6.7.2.1 Galleria\_Auth\_Model.logIn (\$uname, \$pword)

Gets user information and reformatize it.

Uses username and password to get user information from database and saves that info in authentication object. public

##### Parameters:

*string* \$uname  
*string* \$pword

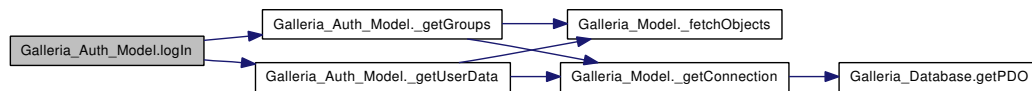

##### Returns:

**Galleria\_Auth\_Object** (p. 41)

Definition at line 32 of file model.php.

References `_getGroups()`, and `_getUserData()`.

Here is the call graph for this function:

### 6.7.2.2 Galleria\_Auth\_Model.\_getUserData (\$username, \$password) [protected]

Gets user information from database.

This function does the database query and returns database query result. private

#### Parameters:

*string* \$username

*string* \$password

#### Returns:

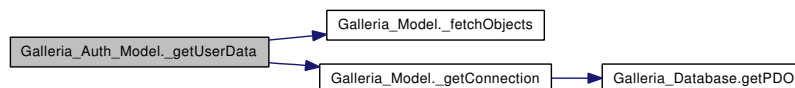

stdClass

Definition at line 54 of file model.php.

References `Galleria_Model._fetchObjects()`, and `Galleria_Model._getConnection()`.

Referenced by `login()`.

Here is the call graph for this function:

### 6.7.2.3 Galleria\_Auth\_Model.\_getGroups (\$userid) [protected]

Gets groups of user.

This function returns groups of user from database. private

#### Parameters:

*integer* \$userid

#### Returns:

array

Definition at line 70 of file model.php.

References `Galleria_Model._fetchObjects()`, and `Galleria_Model._getConnection()`.

## 6.8 Galleria\_Auth\_Object Class Reference

### Public Member Functions

- **\_\_construct** (\$id, \$username, \$usergroups, \$name)
- **logged** ()
- **isAdminGroup** ()
- **getUid** ()
- **getUsergroups** ()
- **getSQLGroups** ()
- **hasGroups** ()
- **update** (\$username, \$groups, \$name)
- **getName** ()
- **getUsername** ()

### Protected Attributes

- **\$\_id**
- **\$\_username**
- **\$\_usergroups**
- **\$\_name**

### 6.8.1 Detailed Description

Definition at line 19 of file object.php.

### 6.8.2 Constructor & Destructor Documentation

#### 6.8.2.1 Galleria\_Auth\_Object.\_\_construct (\$id, \$username, \$usergroups, \$name)

#@- Creates object.

This function is the constructor of **Galleria\_Auth\_Object** (p. 41). public

#### Parameters:

*integer* \$id  
*string* \$username  
*array* \$usergroups  
*string* \$name

Definition at line 57 of file object.php.

### 6.8.3 Member Function Documentation

#### 6.8.3.1 Galleria\_Auth\_Object.logged ()

Is user logged in?

Returns information about if user is logged in. public

**Returns:**

boolean

Definition at line 72 of file object.php.

**6.8.3.2 Galleria\_Auth\_Object.isInAdminGroup ()**

Is user in admin group?

Returns information about if user is administrator. public

**Returns:**

boolean

Definition at line 84 of file object.php.

**6.8.3.3 Galleria\_Auth\_Object.getId ()**

Gives user id.

Returns id of user. public

**Returns:**

integer

Definition at line 102 of file object.php.

**6.8.3.4 Galleria\_Auth\_Object.getUsergroups ()**

Gives groups of user.

Returns all groups where user is in. public

**Returns:**

array

Definition at line 114 of file object.php.

**6.8.3.5 Galleria\_Auth\_Object.getSQLGroups ()**

Gives groups of user.

Return all groups where user is in, but in sql-related string. public

**Returns:**

string

Definition at line 130 of file object.php.

#### 6.8.3.6 Galleria\_Auth\_Object.hasGroups ()

Has groups?

Return boolean for if user has groups. public

**Returns:**

boolean

Definition at line 142 of file object.php.

#### 6.8.3.7 Galleria\_Auth\_Object.update (\$ username, \$ groups, \$ name)

Updates object.

Updates this object with new values, that could be changed. public

**Parameters:**

*string* \$username

*array* \$groups

*string* \$name

Definition at line 156 of file object.php.

#### 6.8.3.8 Galleria\_Auth\_Object.getName ()

Give name.

This function returns name of current user. public

**Returns:**

string

Definition at line 170 of file object.php.

#### 6.8.3.9 Galleria\_Auth\_Object.getUsername ()

Give username.

This function returns username of current user. public

**Returns:**

string

Definition at line 182 of file object.php.

### 6.8.4 Member Data Documentation

#### 6.8.4.1 Galleria\_Auth\_Object.\$\_id [protected]

Definition at line 29 of file object.php.

**6.8.4.2** `Galleria_Auth_Object::$_username` [protected]

Definition at line 34 of file `object.php`.

**6.8.4.3** `Galleria_Auth_Object::$_usergroups` [protected]

Definition at line 39 of file `object.php`.

**6.8.4.4** `Galleria_Auth_Object::$_name` [protected]

Definition at line 44 of file `object.php`.

The documentation for this class was generated from the following file:

- `/var/www/galleria/data/lib/auth/object.php`

## 6.9 Galleria\_Auto\_Configure Class Reference

### Static Public Member Functions

- static **configFiles** (\$elements)

### Static Private Member Functions

- static **\_fileExists** (\$name)
- static **\_distFileData** (\$element)
- static **\_userFileData** (\$element)

#### 6.9.1 Detailed Description

Definition at line 19 of file configure.php.

#### 6.9.2 Member Function Documentation

##### 6.9.2.1 static Galleria\_Auto\_Configure.configFiles (\$ *elements*) [static]

Configure selected files.

Function configures selected files from selected path. Returns state of success. public

##### Parameters:

*array* \$elements

##### Returns:

boolean

Definition at line 32 of file configure.php.

References Galleria\_Configuration.set().

Here is the call graph for this function:

##### 6.9.2.2 static Galleria\_Auto\_Configure.\_fileExists (\$ *name*) [static, private]

Does file exist?

Function checks if file exists and return it content or if it doesn't exists it returns empty array. private

##### Parameters:

*string* \$name

**Returns:**

array

Definition at line 54 of file configure.php.

**6.9.2.3 static Galleria\_Auto\_Configure.\_distFileData (\$ *element*)** [static, private]

Gets distribution file **data** (p. 9).

Function combines requested information and returns file exists function. private

**Parameters:**

*string* \$element PATH\_DATA\_CONFIG

**Returns:**

array

Definition at line 69 of file configure.php.

**6.9.2.4 static Galleria\_Auto\_Configure.\_userFileData (\$ *element*)** [static, private]

Gets local file **data** (p. 9).

Function combines requested information and returns file exists function. private

**Parameters:**

*string* \$element PATH\_DATA\_CONFIG

**Returns:**

array

Definition at line 84 of file configure.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/auto/**configure.php**

## 6.10 Galleria\_Auto\_Load Class Reference

### Static Public Member Functions

- static **start** ()

#### 6.10.1 Detailed Description

Definition at line 19 of file load.php.

#### 6.10.2 Member Function Documentation

##### 6.10.2.1 static Galleria\_Auto\_Load.start () [static]

Starts class auto loading.

This function starts automatic loading for all classes, which are called. public  
PATH\_DATA\_LIB

Definition at line 30 of file load.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/auto/**load.php**

## 6.11 Galleria\_Configuration Class Reference

### Static Public Member Functions

- static **set** (\$configs)
- static **get** ()

#### 6.11.1 Detailed Description

Definition at line 19 of file configuration.php.

#### 6.11.2 Member Function Documentation

##### 6.11.2.1 static Galleria\_Configuration.set (\$ configs) [static]

Sets configurations.

Function sets configuration in object and searialize it in session. State of success is returned. public

##### Parameters:

*array* \$configs

##### Returns:

boolean

Definition at line 32 of file configuration.php.

References Galleria\_Session.set().

Referenced by Galleria\_Auto\_Configure.configFiles().

Here is the call graph for this function:

##### 6.11.2.2 static Galleria\_Configuration.get () [static]

Gets configurations.

Function gets configuration object from session, unserialize it and gives the configuration object. public

##### Returns:

**Galleria\_Configuration\_Object** (p. 50)

Definition at line 46 of file configuration.php.

References Galleria\_Session.get().

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- `/var/www/galleria/data/lib/configuration.php`

## 6.12 Galleria\_Configuration\_Object Class Reference

### Public Member Functions

- **\_\_construct** (array \$options)
- **\_\_get** (\$value)

### Protected Attributes

- **\$\_options**

#### 6.12.1 Detailed Description

Definition at line 19 of file object.php.

#### 6.12.2 Constructor & Destructor Documentation

##### 6.12.2.1 Galleria\_Configuration\_Object.\_\_construct (array \$ *options*)

Creates object.

This is constructor on Configuration Object. public

##### Parameters:

*array* \$options

Definition at line 35 of file object.php.

#### 6.12.3 Member Function Documentation

##### 6.12.3.1 Galleria\_Configuration\_Object.\_\_get (\$ *value*)

Magic get.

This function implements PHP's magic function **\_\_get()** (p. 50). public

##### Parameters:

*string* \$value

##### Returns:

mixed

Definition at line 48 of file object.php.

#### 6.12.4 Member Data Documentation

##### 6.12.4.1 Galleria\_Configuration\_Object.\$\_options [protected]

Definition at line 26 of file object.php.

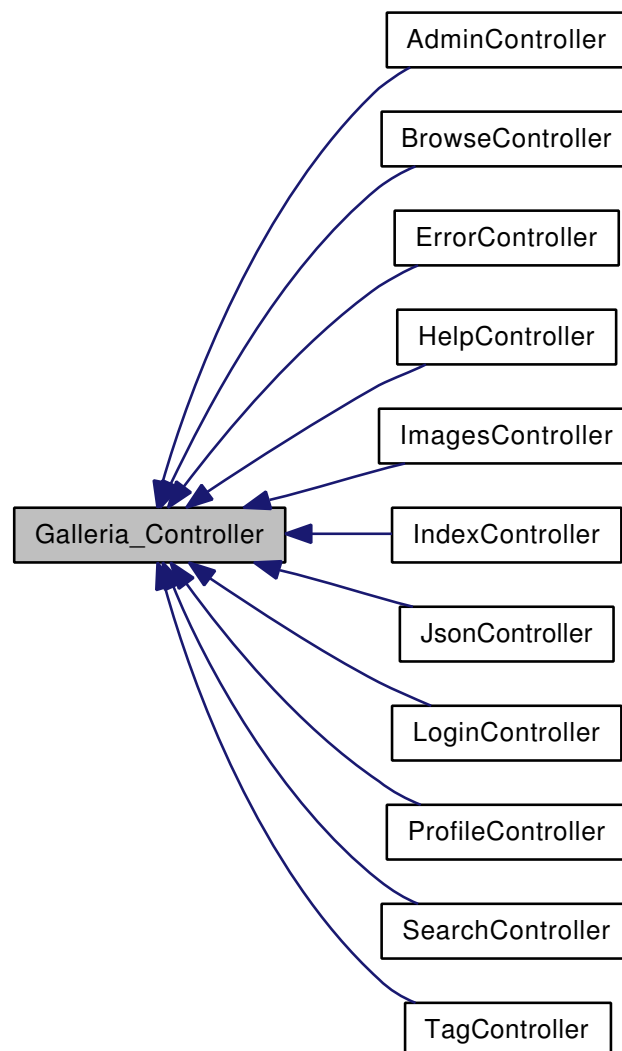

The documentation for this class was generated from the following file:

- `/var/www/galleria/data/lib/configuration/object.php`

## 6.13 Galleria\_Controller Class Reference

Inheritance diagram for Galleria\_Controller:

### Public Member Functions

- **\_\_construct** (\$action, \$model, \$requests)
- **before** ()
- **after** ()
- **getView** ()
- **setNext** (\$cont, \$act)
- **getPage** ()
- **getSubpage** ()
- **redirect** (\$cont, \$act)
- **isRedirected** ()

## Protected Member Functions

- `_getModel ()`

## Protected Attributes

- `$_action`
- `$_model`
- `$_view`
- `$_requests`
- `$_ncont`
- `$_nact`
- `$_redirect`

### 6.13.1 Detailed Description

Definition at line 20 of file controller.php.

### 6.13.2 Constructor & Destructor Documentation

#### 6.13.2.1 Galleria\_Controller.\_\_construct (\$ action, \$ model, \$ requests)

#@- Creates controller.

This is constructor of Controller. public

##### Parameters:

*string* \$action

*Galleria\_Model* (p. 72) \$model

*Galleria\_Requests* (p. 79) \$requests

Definition at line 65 of file controller.php.

### 6.13.3 Member Function Documentation

#### 6.13.3.1 Galleria\_Controller.\_getModel () [protected]

Gives model.

This function gives controller related model. private

##### Returns:

*Galleria\_Model* (p. 72)

##### Exceptions:

*Exception*

Definition at line 84 of file controller.php.

Referenced by `AdminController._insertPicture()`, `ImagesController.fileAction()`, `JsonController.getAction()`, `TagController.indexAction()`, `SearchController.indexAction()`, `ProfileController.indexAction()`, `IndexController.indexAction()`, `ImagesController.indexAction()`, `BrowseController.indexAction()`, `AdminController.picturecontrolAction()`, `JsonController.postAction()`, and `AdminController.usercontrolAction()`.

#### 6.13.3.2 `Galleria_Controller.before ()`

Do before.

These is done before actual action. Returned boolean indicates continuing of controller. public

##### Returns:

boolean

Reimplemented in **`AdminController`** (p. 23), **`JsonController`** (p. 113), **`LoginController`** (p. 129), and **`ProfileController`** (p. 131).

Definition at line 101 of file controller.php.

#### 6.13.3.3 `Galleria_Controller.after ()`

Do after.

These is done after actual action. Returned boolean indicates continuing of controller. public

##### Returns:

boolean

Definition at line 114 of file controller.php.

#### 6.13.3.4 `Galleria_Controller.getView ()`

Gives view.

This function returns the view of controller. public

##### Returns:

**`Galleria_View`** (p. 90)

Definition at line 126 of file controller.php.

Referenced by `AdminController._insertPicture()`, `JsonController.before()`, `ImagesController.fileAction()`, `JsonController.getAction()`, `TagController.indexAction()`, `SearchController.indexAction()`, `ProfileController.indexAction()`, `JsonController.indexAction()`, `IndexController.indexAction()`, `ImagesController.indexAction()`, `BrowseController.indexAction()`, `AdminController.picturecontrolAction()`, `JsonController.postAction()`, and `AdminController.usercontrolAction()`.

#### 6.13.3.5 `Galleria_Controller.setNext ($ cont, $ act)`

Sets next.

This function sets next controller and action, which will be runned. public

**Parameters:**

*string* \$cont

*string* \$act

Definition at line 139 of file controller.php.

Referenced by ProfileController.before(), AdminController.before(), and redirect().

**6.13.3.6 Galleria\_Controller.getPage ()**

Gives next controller.

Gives next controller, which will be runned. public

**Returns:**

string

Definition at line 152 of file controller.php.

**6.13.3.7 Galleria\_Controller.getSubpage ()**

Gives next controller action.

Gives next controller action, which will be runned. public

**Returns:**

string

Definition at line 164 of file controller.php.

**6.13.3.8 Galleria\_Controller.redirect (\$ cont, \$ act)**

Sets redirection.

This function not just tells next controller and action. It also tells to stop further rendering and jump to totally new page. public

Definition at line 176 of file controller.php.

References setNext().

Here is the call graph for this function:

**6.13.3.9 Galleria\_Controller.isRedirected ()**

Will redirect?

Tells if redirection is set. public

**Returns:**

boolean

Definition at line 189 of file controller.php.

**6.13.4 Member Data Documentation****6.13.4.1 Galleria\_Controller::\$\_action** [protected]

Definition at line 29 of file controller.php.

**6.13.4.2 Galleria\_Controller::\$\_model** [protected]

Definition at line 33 of file controller.php.

**6.13.4.3 Galleria\_Controller::\$\_view** [protected]

Definition at line 37 of file controller.php.

**6.13.4.4 Galleria\_Controller::\$\_requests** [protected]

Definition at line 41 of file controller.php.

**6.13.4.5 Galleria\_Controller::\$\_ncont** [protected]

Definition at line 45 of file controller.php.

**6.13.4.6 Galleria\_Controller::\$\_nact** [protected]

Definition at line 49 of file controller.php.

**6.13.4.7 Galleria\_Controller::\$\_redirect** [protected]

Definition at line 53 of file controller.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/controller.php

## 6.14 Galleria\_Database Class Reference

### Static Public Member Functions

- static **init** (\$configs)
- static **getPDO** ()

### Static Private Attributes

- static **\$\_pdo** = null

#### 6.14.1 Detailed Description

Definition at line 19 of file database.php.

#### 6.14.2 Member Function Documentation

##### 6.14.2.1 static Galleria\_Database.init (\$ configs) [static]

Initialize database functionality.

This function initializes database functionality with configurations. public

##### Parameters:

*array* \$configs

Definition at line 37 of file database.php.

##### 6.14.2.2 static Galleria\_Database.getPDO () [static]

Gives PDO.

This function gives correct PDO. public

##### Returns:

**Galleria\_Database\_Pdo** (p. 58)

Definition at line 50 of file database.php.

Referenced by Galleria\_Model.\_getConnection().

#### 6.14.3 Member Data Documentation

##### 6.14.3.1 Galleria\_Database.\$\_pdo = null [static, private]

Definition at line 27 of file database.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/**database.php**

## 6.15 Galleria\_Database\_Pdo Class Reference

### Public Member Functions

- **\_\_construct** (\$configs)

#### 6.15.1 Detailed Description

Definition at line 19 of file pdo.php.

#### 6.15.2 Constructor & Destructor Documentation

##### 6.15.2.1 Galleria\_Database\_Pdo.\_\_construct (\$ *configs*)

Creates Pdo.

This is constructor of Pdo. public

#### Parameters:

*array* \$configs

Definition at line 29 of file pdo.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/database/**pdo.php**

## 6.16 Galleria\_Element\_Category Class Reference

### Public Member Functions

- **\_\_construct** (\$id, \$name, \$parent=null, \$pics=true)
- **addChild** (Galleria\_Element\_Category \$child)
- **addChildren** (\$children)
- **\_\_toString** ()
- **getName** ()
- **getId** ()
- **getParent** ()
- **hasPics** ()
- **getChildren** ()
- **hasChildren** ()
- **getCount** ()

### Static Public Member Functions

- static **create** (\$cats)
- static **howMany** (\$element)
- static **jsonFormat** (\$element)

### Protected Attributes

- **\$\_id**
- **\$\_parent**
- **\$\_name**
- **\$\_children**
- **\$\_pics**

### Static Private Member Functions

- static **\_appendChildren** (\$parent, \$children)

#### 6.16.1 Detailed Description

Definition at line 19 of file category.php.

#### 6.16.2 Constructor & Destructor Documentation

##### 6.16.2.1 Galleria\_Element\_Category.\_\_construct (\$id, \$name, \$parent = null, \$pics = true)

#@- Creates category element.

This is constructor of category element. public

##### Parameters:

*integer* \$id

*string* \$name

*integer* \$parent

*boolean* \$pics

Definition at line 57 of file category.php.

## 6.16.3 Member Function Documentation

### 6.16.3.1 Galleria\_Element\_Category.addChild (Galleria\_Element\_Category \$ child)

Add child.

This function adds child to this category. public

#### Parameters:

*Galleria\_Element\_Category* (p. 59) \$child

Definition at line 73 of file category.php.

### 6.16.3.2 Galleria\_Element\_Category.addChildren (\$ children)

Add children.

This function adds children to this category. public

#### Parameters:

*array* \$children

Definition at line 85 of file category.php.

### 6.16.3.3 Galleria\_Element\_Category.\_\_toString ()

To string.

This function converts category element to string. public

#### Returns:

string

Definition at line 97 of file category.php.

References getName().

Here is the call graph for this function:

#### 6.16.3.4 Galleria\_Element\_Category.getName ()

Gives name.

This function gives name of category element. public

**Returns:**

string

Definition at line 109 of file category.php.

Referenced by \_\_toString(), and jsonFormat().

#### 6.16.3.5 Galleria\_Element\_Category.getId ()

Gives id.

This function gives id of category element. public

**Returns:**

integer

Definition at line 121 of file category.php.

Referenced by \_appendChildren(), and jsonFormat().

#### 6.16.3.6 Galleria\_Element\_Category.getParent ()

Gives parent.

This function gives parent of category element. public

**Returns:**

integer

Definition at line 133 of file category.php.

Referenced by \_appendChildren().

#### 6.16.3.7 Galleria\_Element\_Category.hasPics ()

Has pictures?

This function tells if category element has pictures. public

**Returns:**

boolean

Definition at line 145 of file category.php.

### 6.16.3.8 Galleria\_Element\_Category.getChildren ()

Gives children.

This function gives children of category element. public

#### Returns:

array

Definition at line 157 of file category.php.

Referenced by getCount(), and jsonFormat().

### 6.16.3.9 Galleria\_Element\_Category.hasChildren ()

Has children?

This function tells if category element has children. public

#### Returns:

boolean

Definition at line 169 of file category.php.

Referenced by getCount(), and jsonFormat().

### 6.16.3.10 Galleria\_Element\_Category.getCount ()

Count.

This function returns number of category elements following. public

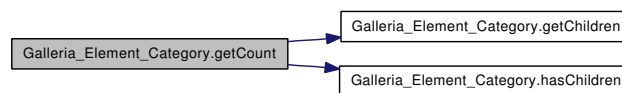

#### Returns:

integer

Definition at line 181 of file category.php.

References getChildren(), and hasChildren().

Here is the call graph for this function:

### 6.16.3.11 static Galleria\_Element\_Category.create (\$ cats) [static]

Creates category element.

This function creates category element tree from list of array. public

#### Parameters:

**array** \$cats

**Returns:**

array

Definition at line 201 of file category.php.

Referenced by JsonController.getAction(), and BrowseController.indexAction().

### 6.16.3.12 static Galleria\_Element\_Category.\_appendChildren (\$parent, \$children) [static, private]

Appends children.

This function appends children for specific category element. private

**Parameters:**

*integer* \$parent

*array* \$children

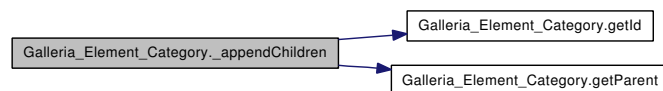

**Returns:**

array

Definition at line 220 of file category.php.

References getId(), and getParent().

Here is the call graph for this function:

### 6.16.3.13 static Galleria\_Element\_Category.howMany (\$element) [static]

How many?

This function tells how many items are in hierarchy. public

**Parameters:**

*array|Galleria\_Element\_Category* \$element

**Returns:**

integer

Definition at line 245 of file category.php.

Referenced by JsonController.getAction().

#### 6.16.3.14 static Galleria\_Element\_Category.jsonFormat (\$ *element*) [static]

JSON format.

This function creates specific format for this elements type. public

##### Parameters:

*array*|*Galleria\_Element\_Category* \$element

##### Returns:

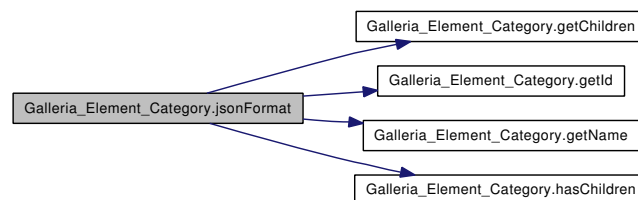

array

Definition at line 266 of file category.php.

References getChildren(), getId(), getName(), and hasChildren().

Referenced by JsonController.getAction().

Here is the call graph for this function:

### 6.16.4 Member Data Documentation

#### 6.16.4.1 Galleria\_Element\_Category.\$\_id [protected]

Definition at line 28 of file category.php.

#### 6.16.4.2 Galleria\_Element\_Category.\$\_parent [protected]

Definition at line 32 of file category.php.

#### 6.16.4.3 Galleria\_Element\_Category.\$\_name [protected]

Definition at line 36 of file category.php.

#### 6.16.4.4 Galleria\_Element\_Category.\$\_children [protected]

Definition at line 40 of file category.php.

#### 6.16.4.5 Galleria\_Element\_Category.\$\_pics [protected]

Definition at line 44 of file category.php.

The documentation for this class was generated from the following file:

- `/var/www/gallery/data/lib/element/category.php`

## 6.17 Galleria\_Image Class Reference

### Static Public Member Functions

- static **getData** (\$id, \$size= "")
- static **getFileSize** (\$id, \$size= "")
- static **fileNotFound** (\$size= "")
- static **permissionDenied** (\$size= "")
- static **fileFound** (\$id)
- static **transform** ()
- static **deleteFiles** (\$pid)

#### 6.17.1 Detailed Description

Definition at line 19 of file image.php.

#### 6.17.2 Member Function Documentation

##### 6.17.2.1 static Galleria\_Image.getData (\$ id, \$ size = "") [static]

Get image **data** (p. 9).

This function includes the image **data** (p. 9) from file and returns it. public

##### Parameters:

*integer* \$id  
*string* \$size

##### Returns:

string|boolean PATH\_DATA\_SITE\_IMAGES

Definition at line 33 of file image.php.

Referenced by ImagesController.fileAction().

##### 6.17.2.2 static Galleria\_Image.getFilesize (\$ id, \$ size = "") [static]

Get image filesize.

This function gets image filesize and returns it. public

##### Parameters:

*integer* \$id  
*string* \$size

##### Returns:

integer PATH\_DATA\_SITE\_IMAGES

Definition at line 49 of file image.php.

Referenced by ImagesController.fileAction().

**6.17.2.3 static Galleria\_Image.fileNotFound (\$ size = ") [static]**

Get 404 image **data** (p. 9).

This function includes the 404 image **data** (p. 9) from file and returns it. public

**Parameters:**

*string* \$size

**Returns:**

string|boolean PATH\_DATA\_SITE\_IMAGES

Definition at line 64 of file image.php.

Referenced by ImagesController.fileAction().

**6.17.2.4 static Galleria\_Image.permissionDenied (\$ size = ") [static]**

Get 403 image **data** (p. 9).

This function includes the 403 image **data** (p. 9) from file and returns it. public

**Parameters:**

*string* \$size

**Returns:**

string|boolean PATH\_DATA\_SITE\_IMAGES

Definition at line 79 of file image.php.

Referenced by ImagesController.fileAction().

**6.17.2.5 static Galleria\_Image.fileFound (\$ id) [static]**

Does file found?

This function checks if file exists. public

**Parameters:**

*integer* \$id

**Returns:**

boolean PATH\_DATA\_SITE\_IMAGES

Definition at line 94 of file image.php.

Referenced by ImagesController.fileAction().

**6.17.2.6 static Galleria\_Image.transform ()** [static]

Runs transformation.

This function runs image transrofmatation. PATH\_DATA\_SITE\_IMAGES

Definition at line 105 of file image.php.

Referenced by AdminController.\_insertPicture().

**6.17.2.7 static Galleria\_Image.deleteFiles (\$pid)** [static]

Delete files.

This function delete files for specific picture id. public

**Parameters:**

*integer* \$pid PATH\_DATA\_SITE\_IMAGES

Definition at line 120 of file image.php.

Referenced by JsonController.postAction().

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/**image.php**

## 6.18 Galleria\_Image\_Object Class Reference

### Public Member Functions

- **\_\_construct** (stdClass \$obj)
- **getId** ()
- **getAlt** ()
- **getYear** ()
- **getPg** ()
- **getCat** ()
- **getDesc** ()
- **isShown** ()

### Protected Attributes

- **\$\_id**
- **\$\_pg**
- **\$\_year**
- **\$\_desc**
- **\$\_shown**
- **\$\_cat**

#### 6.18.1 Detailed Description

Definition at line 19 of file object.php.

#### 6.18.2 Constructor & Destructor Documentation

##### 6.18.2.1 Galleria\_Image\_Object.\_\_construct (stdClass \$obj)

#@- Creates image object.

This is constructor of image object. public

##### Parameters:

*stdClass* \$obj

Definition at line 58 of file object.php.

#### 6.18.3 Member Function Documentation

##### 6.18.3.1 Galleria\_Image\_Object.getId ()

Gives id.

This function returns id of image. public

##### Returns:

integer

Definition at line 75 of file object.php.

**6.18.3.2 Galleria\_Image\_Object.getAlt ()**

Gives alt-text.

This function returns alternative text of image. public

**Returns:**

string

Definition at line 87 of file object.php.

**6.18.3.3 Galleria\_Image\_Object.getYear ()**

Gives year.

This function returns year of image. public

**Returns:**

string

Definition at line 99 of file object.php.

**6.18.3.4 Galleria\_Image\_Object.getPg ()**

Gives photographer.

This function returns photographer of image. public

**Returns:**

integer

Definition at line 111 of file object.php.

**6.18.3.5 Galleria\_Image\_Object.getCat ()**

Gives category.

This function returns category of image. public

**Returns:**

integer

Definition at line 123 of file object.php.

**6.18.3.6 Galleria\_Image\_Object.getDesc ()**

Gives description.

This function returns description of image. public

**Returns:**

integer

Definition at line 135 of file object.php.

### 6.18.3.7 Galleria\_Image\_Object.isShown ()

Is shown?

This function tells if picture is shown. public

#### Returns:

boolean

Definition at line 147 of file object.php.

Referenced by Galleria\_View\_Pictures.format().

## 6.18.4 Member Data Documentation

### 6.18.4.1 Galleria\_Image\_Object.\$\_id [protected]

Definition at line 28 of file object.php.

### 6.18.4.2 Galleria\_Image\_Object.\$\_pg [protected]

Definition at line 32 of file object.php.

### 6.18.4.3 Galleria\_Image\_Object.\$\_year [protected]

Definition at line 36 of file object.php.

### 6.18.4.4 Galleria\_Image\_Object.\$\_desc [protected]

Definition at line 40 of file object.php.

### 6.18.4.5 Galleria\_Image\_Object.\$\_shown [protected]

Definition at line 44 of file object.php.

### 6.18.4.6 Galleria\_Image\_Object.\$\_cat [protected]

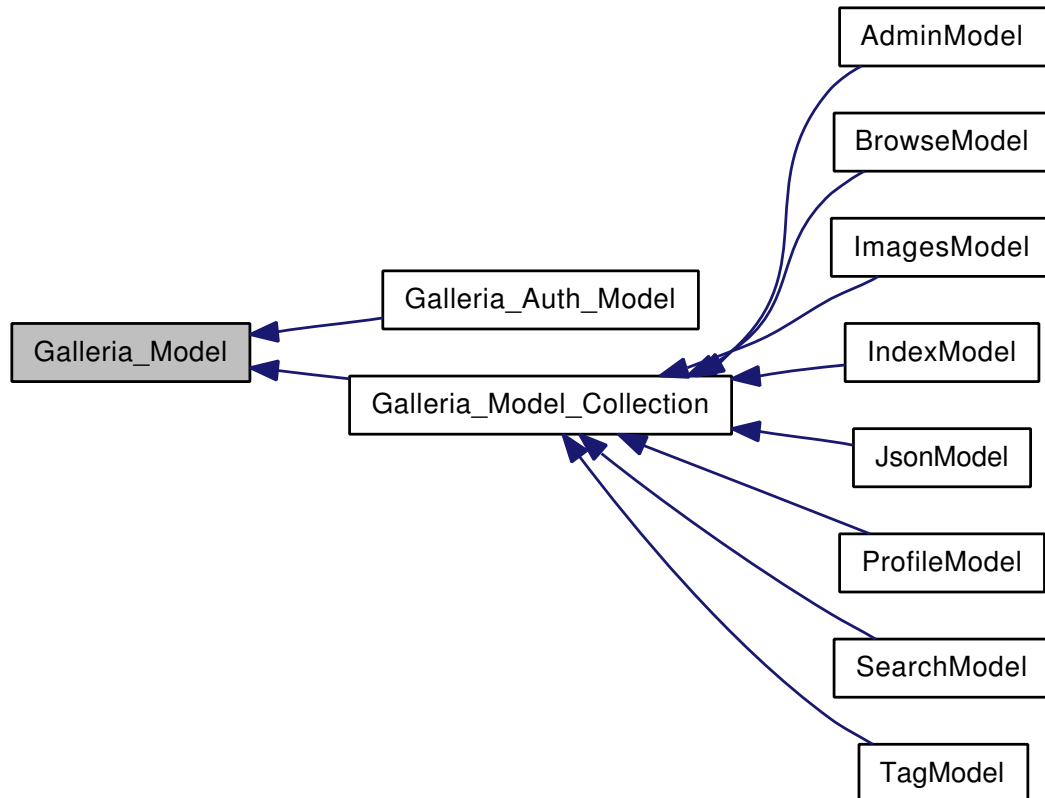

Definition at line 48 of file object.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/image/object.php

## 6.19 Galleria\_Model Class Reference

Inheritance diagram for Galleria\_Model:

### Protected Member Functions

- `_getConnection ()`
- `_fetchObjects ($state)`
- `_prepareIn ($values)`

#### 6.19.1 Detailed Description

Definition at line 20 of file model.php.

#### 6.19.2 Member Function Documentation

##### 6.19.2.1 Galleria\_Model.\_getConnection () [protected]

Gives database connetion.

This function gives database connection, the PDO object. private

**Returns:**

**Galleria\_Database\_Pdo** (p. 58)

Definition at line 30 of file model.php.

References Galleria\_Database.getPDO().

Referenced by Galleria\_Model\_Collection.\_addChangelog(), JsonModel.\_addNewTag(), JsonModel.\_deleteEmptyTags(), Galleria\_Auth\_Model.\_getGroups(), JsonModel.\_getTagId(), Galleria\_Auth\_Model.\_getUserData(), JsonModel.addCat(), AdminModel.addNewGroup(), AdminModel.addNewUser(), AdminModel.addPicture(), JsonModel.addTag(), JsonModel.addUserInGroup(), JsonModel.changeCat(), JsonModel.changeDesc(), JsonModel.changePg(), ProfileModel.changePw(), JsonModel.changeYear(), ImagesModel.checkPermission(), JsonModel.deleteCat(), JsonModel.deleteGroup(), JsonModel.deletePic(), JsonModel.deletePicTag(), JsonModel.deleteUser(), JsonModel.delUserInGroup(), ImagesModel.fileFound(), BrowseModel.getCategories(), BrowseModel.getCatName(), Galleria\_Model\_Collection.getCats(), JsonModel.getChangelog(), Galleria\_Auth\_Model.getData(), AdminModel.getGroups(), Galleria\_Model\_Collection.getGroups(), JsonModel.getGroupsFromCat(), JsonModel.getGroupsFromUser(), ImagesModel.getImageInfo(), ImagesModel.getImageTags(), IndexModel.getLatestPictures(), JsonModel.getPgs(), TagModel.getPics(), AdminModel.getPics(), BrowseModel.getPictures(), Galleria\_Model\_Collection.getSearchPictures(), IndexModel.getStats(), TagModel.getTagName(), Galleria\_Model\_Collection.getTags(), ProfileModel.getUserPics(), AdminModel.getUsers(), JsonModel.groupAdmin(), JsonModel.pictureVisibility(), JsonModel.saveCatGroups(), JsonModel.saveCats(), and JsonModel.userActivity().

Here is the call graph for this function:

### 6.19.2.2 Galleria\_Model.\_fetchObjects (\$ state) [protected]

Fetch objects.

This function fetches objects and returns object array. private

#### Parameters:

*PDOStatement* \$state

#### Returns:

array

Definition at line 43 of file model.php.

Referenced by Galleria\_Auth\_Model.\_getGroups(), Galleria\_Auth\_Model.\_getUserData(), ImagesModel.fileFound(), BrowseModel.getCategories(), Galleria\_Model\_Collection.getCats(), JsonModel.getChangelog(), AdminModel.getGroups(), Galleria\_Model\_Collection.getGroups(), JsonModel.getGroupsFromCat(), JsonModel.getGroupsFromUser(), ImagesModel.getImageTags(), IndexModel.getLatestPictures(), JsonModel.getPgs(), TagModel.getPics(), AdminModel.getPics(), BrowseModel.getPictures(), Galleria\_Model\_Collection.getSearchPictures(), Galleria\_Model\_Collection.getTags(), ProfileModel.getUserPics(), and AdminModel.getUsers().

### 6.19.2.3 Galleria\_Model.\_prepareIn (\$ values) [protected]

Prepare in sentence.

This function adds correct value of ?-marks in line for IN statement. private

**Parameters:**

*array* \$values

**Returns:**

string

Definition at line 60 of file model.php.

Referenced by ImagesModel.checkPermission(), BrowseModel.getCategories(), BrowseModel.getCatName(), ImagesModel.getImageInfo(), IndexModel.getLatestPictures(), TagModel.getPics(), BrowseModel.getPictures(), Galleria\_Model\_Collection.getSearchPictures(), IndexModel.getStats(), and Galleria\_Model\_Collection.getTags().

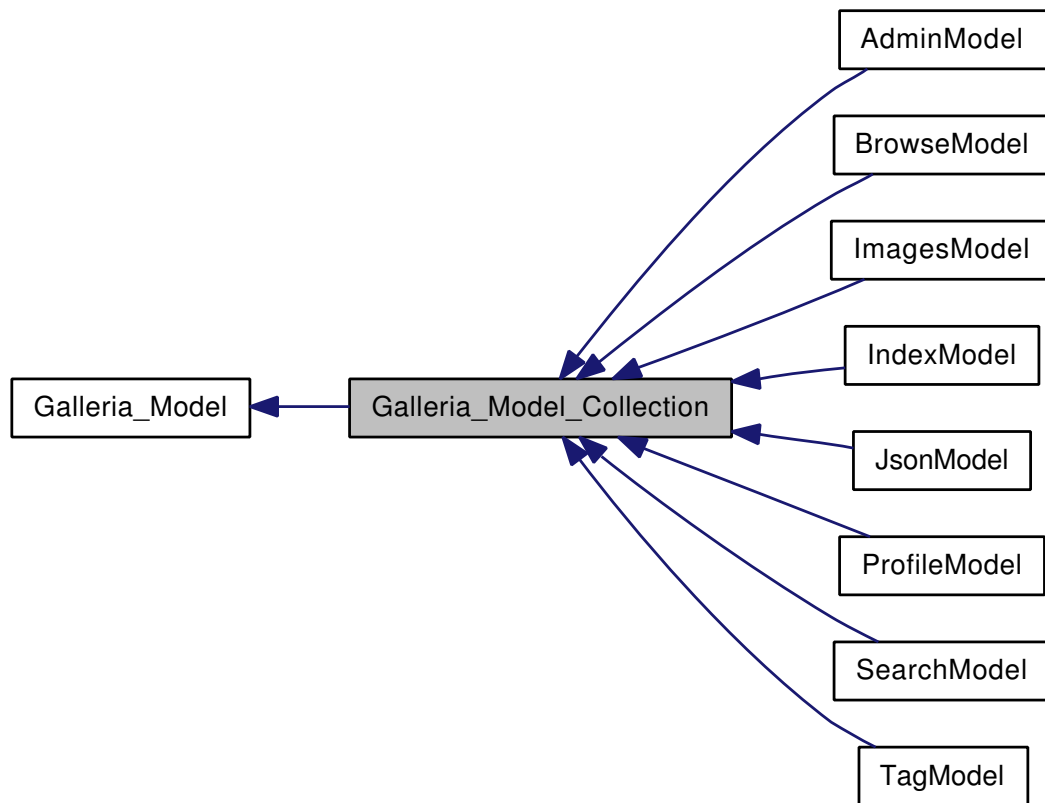

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/**model.php**

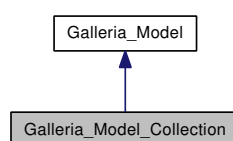

## 6.20 Galleria\_Model\_Collection Class Reference

Inheritance diagram for Galleria\_Model\_Collection:

Collaboration diagram for Galleria\_Model\_Collection:

### Public Member Functions

- `getSearchPictures ($text, $pg, $year)`
- `getCats ()`
- `getGroups ()`
- `getTags ()`

### Protected Member Functions

- `_addChangelog ($uid, $pid, $action)`

### 6.20.1 Detailed Description

Definition at line 20 of file collection.php.

### 6.20.2 Member Function Documentation

#### 6.20.2.1 Galleria\_Model\_Collection.getSearchPictures (\$ text, \$ pg, \$ year)

Gives searched pictures.

This function gets searched pictures. public

##### Parameters:

*string* \$text

*string* \$pg

*string* \$year

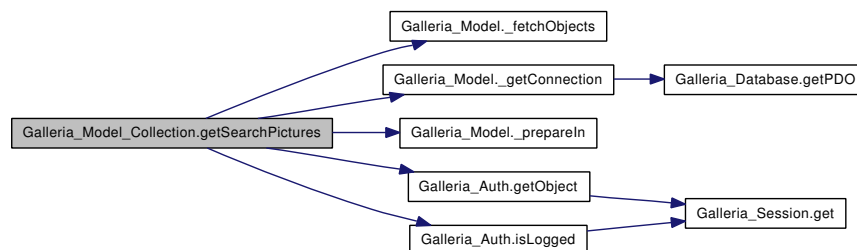

##### Returns:

array

Definition at line 33 of file collection.php.

References Galleria\_Model.\_fetchObjects(), Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

#### 6.20.2.2 Galleria\_Model\_Collection.getCats ()

Gives categories.

This function returns categories from database. public

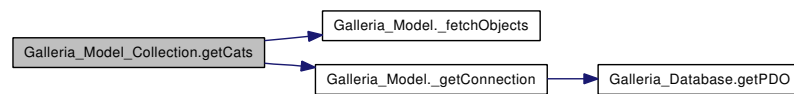

##### Returns:

array

Definition at line 56 of file collection.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.20.2.3 Galleria\_Model\_Collection.getGroups ()

Gives groups.

This function returns group **data** (p. 9) from database. public

#### Returns:

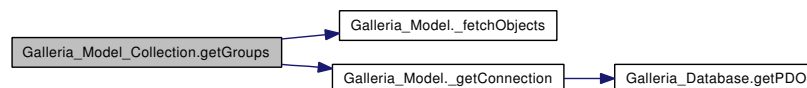

array

Reimplemented in **AdminModel** (p. 26).

Definition at line 71 of file collection.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.20.2.4 Galleria\_Model\_Collection.getTags ()

Gives tags.

This function gets tags from database. public

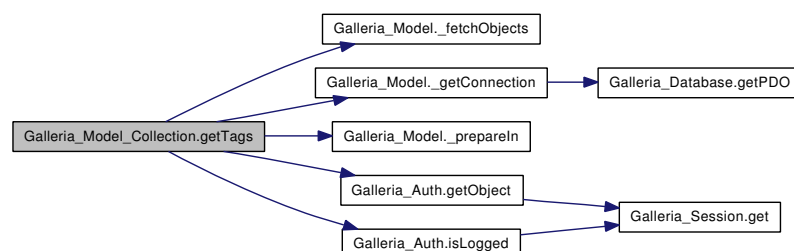

#### Returns:

array

Definition at line 86 of file collection.php.

References Galleria\_Model.\_fetchObjects(), Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

#### 6.20.2.5 Galleria\_Model\_Collection.\_addChangelog (\$uid, \$pid, \$action) [protected]

Add to changelog.

This function adds **data** (p.9) to changelog of picture. private

##### Parameters:

*integer* \$uid

*integer* \$pid

*string* \$action

##### Returns:

boolean

Definition at line 114 of file collection.php.

References Galleria\_Model.\_getConnection().

Referenced by AdminModel.addPicture(), JsonModel.addTag(), JsonModel.changeCat(), JsonModel.changeDesc(), JsonModel.changePg(), JsonModel.changeYear(), JsonModel.deletePicTag(), and JsonModel.pictureVisibility().

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/model/**collection.php**

## 6.21 Galleria\_Requests Class Reference

### Public Member Functions

- **\_\_construct** (\$gets, \$posts)
- **gets** ()
- **posts** ()
- **hasGet** ()
- **hasPost** ()

### Protected Attributes

- **\$\_gets**
- **\$\_posts**

#### 6.21.1 Detailed Description

Definition at line 20 of file requests.php.

#### 6.21.2 Constructor & Destructor Documentation

##### 6.21.2.1 Galleria\_Requests.\_\_construct (\$ gets, \$ posts)

#@- Creates requests.

This is constructor for requests. public

##### Parameters:

*array* \$gets

*array* \$posts

Definition at line 44 of file requests.php.

#### 6.21.3 Member Function Documentation

##### 6.21.3.1 Galleria\_Requests.gets ()

Gives gets.

This function returns gets. public

##### Returns:

**Galleria\_Requests\_Gets** (p. 81)

Definition at line 57 of file requests.php.

### 6.21.3.2 **Galleria\_Requests.posts ()**

Gives posts.

This function returns posts. public

#### **Returns:**

**Galleria\_Requests\_Posts** (p. 83)

Definition at line 69 of file requests.php.

### 6.21.3.3 **Galleria\_Requests.hasGet ()**

Has get?

This function tells if gets are setted. public

#### **Returns:**

boolean

Definition at line 81 of file requests.php.

### 6.21.3.4 **Galleria\_Requests.hasPost ()**

Has posts?

This function tells if posts are setted. public

#### **Returns:**

boolean

Definition at line 93 of file requests.php.

## 6.21.4 **Member Data Documentation**

### 6.21.4.1 **Galleria\_Requests.\$\_gets** [protected]

Definition at line 29 of file requests.php.

### 6.21.4.2 **Galleria\_Requests.\$\_posts** [protected]

Definition at line 33 of file requests.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/**requests.php**

## 6.22 Galleria\_Requests\_Gets Class Reference

### Public Member Functions

- **\_\_construct** (\$values)
- **\_\_get** (\$value)
- **\_\_set** (\$name, \$value)

### Protected Attributes

- **\$\_values**

#### 6.22.1 Detailed Description

Definition at line 20 of file gets.php.

#### 6.22.2 Constructor & Destructor Documentation

##### 6.22.2.1 Galleria\_Requests\_Gets.\_\_construct (\$ values)

Creates Gets.

This is constructor of Gets. public

##### Parameters:

*array* \$values

Definition at line 36 of file gets.php.

#### 6.22.3 Member Function Documentation

##### 6.22.3.1 Galleria\_Requests\_Gets.\_\_get (\$ value)

Gets variable.

This is PHP's magic method implementation for \_\_get. public

##### Parameters:

*string* \$value

##### Returns:

string

Definition at line 52 of file gets.php.

### 6.22.3.2 Galleria\_Requests\_Gets.\_\_set (\$ name, \$ value)

Sets variable.

This is PHP's magic method implementation for \_\_set. public

#### Parameters:

*string* \$name

*string* \$value

Definition at line 65 of file gets.php.

## 6.22.4 Member Data Documentation

### 6.22.4.1 Galleria\_Requests\_Gets.\$\_values [protected]

Definition at line 27 of file gets.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/requests/**gets.php**

## 6.23 Galleria\_Requests\_Posts Class Reference

### Public Member Functions

- **\_\_construct** (\$values)
- **\_\_get** (\$value)
- **\_\_set** (\$name, \$value)

### Protected Attributes

- **\$\_values**

#### 6.23.1 Detailed Description

Definition at line 20 of file posts.php.

#### 6.23.2 Constructor & Destructor Documentation

##### 6.23.2.1 Galleria\_Requests\_Posts::\_\_construct (\$ values)

Creates Posts.

This is constructor of Posts. public

##### Parameters:

*array* \$values

Definition at line 36 of file posts.php.

#### 6.23.3 Member Function Documentation

##### 6.23.3.1 Galleria\_Requests\_Posts::\_\_get (\$ value)

Gets variable.

This is PHP's magic method implementation for \_\_get. public

##### Parameters:

*string* \$value

##### Returns:

string

Definition at line 52 of file posts.php.

#### 6.23.3.2 Galleria\_Requests\_Posts.\_\_set (\$ *name*, \$ *value*)

Sets variable.

This is PHP's magic method implementation for \_\_set. public

##### Parameters:

*string* \$name

*string* \$value

Definition at line 65 of file posts.php.

### 6.23.4 Member Data Documentation

#### 6.23.4.1 Galleria\_Requests\_Posts.\$\_values [protected]

Definition at line 27 of file posts.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/requests/**posts.php**

## 6.24 Galleria\_Session Class Reference

### Static Public Member Functions

- static **set** (\$name, \$value)
- static **get** (\$name)
- static **del** (\$name)

#### 6.24.1 Detailed Description

Definition at line 27 of file session.php.

#### 6.24.2 Member Function Documentation

##### 6.24.2.1 static Galleria\_Session.set (\$ name, \$ value) [static]

Sets session variable.

This function inserts value for named variable. public

##### Parameters:

*string* \$name

*mixed* \$value

##### Returns:

mixed

Definition at line 40 of file session.php.

Referenced by Galleria\_Auth.init(), Galleria\_Configuration.set(), and Galleria\_Auth.tryLog().

##### 6.24.2.2 static Galleria\_Session.get (\$ name) [static]

Gets session variable.

This function gives value of session variable. public

##### Parameters:

*string* \$name

##### Returns:

mixed

Definition at line 54 of file session.php.

Referenced by Galleria\_Configuration.get(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

**6.24.2.3 static Galleria\_Session.del (\$ *name*)** [static]

Deletes session variable.

This function deletes variable from session. public

**Parameters:**

*string* \$name

**Returns:**

boolean

Definition at line 68 of file session.php.

Referenced by Galleria\_Auth.logout().

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/session.php

## 6.25 Galleria\_Site Class Reference

### Static Public Member Functions

- static `render ()`

### Static Protected Member Functions

- static `_quickRender ()`
- static `_parseParams ()`
- static `_loadModel ()`
- static `_loadView ()`
- static `_loadController ()`
- static `_activateView ()`
- static `_redir ()`

### Static Protected Attributes

- static `$_page = 'index'`
- static `$_subpage = 'index'`
- static `$_requests = null`
- static `$_model = null`
- static `$_viewpath = null`
- static `$_controller = null`

### 6.25.1 Detailed Description

Definition at line 19 of file site.php.

### 6.25.2 Member Function Documentation

#### 6.25.2.1 static Galleria\_Site.render () [static]

##- Render view.

This function does the rendering operations. public

Definition at line 59 of file site.php.

Referenced by `_activateView()`.

#### 6.25.2.2 static Galleria\_Site.\_quickRender () [static, protected]

Quick render.

This function does the main parts for rendering, which are also used for redirections. private

Definition at line 76 of file site.php.

**6.25.2.3 static Galleria\_Site.\_parseParams ()** [static, protected]

Parses parameters.

This function parses all request to page hierarchy and request object. private

WWWROOT, SERVER, GET, POST

Definition at line 91 of file site.php.

**6.25.2.4 static Galleria\_Site.\_loadModel ()** [static, protected]

Load model.

This function loads model. private

PATH\_DATA\_SITE\_MVC\_MODEL

Definition at line 111 of file site.php.

**6.25.2.5 static Galleria\_Site.\_loadView ()** [static, protected]

Load view.

This function loads view. private

PATH\_DATA\_SITE\_MVC\_VIEW\_SCRIPTS

Definition at line 126 of file site.php.

**6.25.2.6 static Galleria\_Site.\_loadController ()** [static, protected]

Load controller.

This function loads controller. private

PATH\_DATA\_SITE\_MVC\_CONTROLLER

Definition at line 142 of file site.php.

**6.25.2.7 static Galleria\_Site.\_activateView ()** [static, protected]

Activate view.

This function activates view. private

WWWROOT, PATH\_DATA\_SITE\_MVC\_VIEW\_LAYOUT

Definition at line 176 of file site.php.

References render().

Here is the call graph for this function:

**6.25.2.8 static Galleria\_Site.\_redir ()** [static, protected]

Redirects.

This function redirects to other location. private

WWWROOT

Definition at line 209 of file site.php.

**6.25.3 Member Data Documentation****6.25.3.1 Galleria\_Site.\$\_page = 'index'** [static, protected]

Definition at line 29 of file site.php.

**6.25.3.2 Galleria\_Site.\$\_subpage = 'index'** [static, protected]

Definition at line 33 of file site.php.

**6.25.3.3 Galleria\_Site.\$\_requests = null** [static, protected]

Definition at line 37 of file site.php.

**6.25.3.4 Galleria\_Site.\$\_model = null** [static, protected]

Definition at line 41 of file site.php.

**6.25.3.5 Galleria\_Site.\$\_viewpath = null** [static, protected]

Definition at line 45 of file site.php.

**6.25.3.6 Galleria\_Site.\$\_controller = null** [static, protected]

Definition at line 49 of file site.php.

The documentation for this class was generated from the following file:

- /var/www/gallery/data/lib/site.php

## 6.26 Galleria\_View Class Reference

### Public Member Functions

- **\_\_construct** ()
- **setRender** (\$value)
- **render** ()
- **setRenderLayout** (\$value)
- **renderLayout** ()
- **\_\_get** (\$name)
- **\_\_set** (\$name, \$value)

### Protected Attributes

- **\$\_render**
- **\$\_layout**
- **\$\_variables**

### 6.26.1 Detailed Description

Definition at line 19 of file view.php.

### 6.26.2 Constructor & Destructor Documentation

#### 6.26.2.1 Galleria\_View.\_\_construct ()

##- Creates view.

This is constructor of view. public

Definition at line 45 of file view.php.

### 6.26.3 Member Function Documentation

#### 6.26.3.1 Galleria\_View.setRender (\$ value)

Set rendered.

This function sets if view is rendered. public

##### Parameters:

*boolean* \$value

Definition at line 59 of file view.php.

#### 6.26.3.2 Galleria\_View.render ()

Is rendered?

This function tells if view is rendered. public

**Returns:**

boolean

Definition at line 72 of file view.php.

**6.26.3.3 Galleria\_View.setRenderLayout (\$ value)**

Set layout rendered.

This function sets if layout is rendered. public

**Parameters:**

*boolean* \$value

Definition at line 84 of file view.php.

**6.26.3.4 Galleria\_View.renderLayout ()**

Is layout rendered?

This function tells if view is rendered. public

**Returns:**

boolean

Definition at line 97 of file view.php.

**6.26.3.5 Galleria\_View.\_\_get (\$ name)**

Get variable.

This is implementation for PHP's magic method \_\_get to get view variables. public

**Parameters:**

*string* \$name

**Returns:**

mixed

Definition at line 111 of file view.php.

**6.26.3.6 Galleria\_View.\_\_set (\$ name, \$ value)**

Set variable.

This is implementation for PHP's magic method \_\_set to set view variables. public

**Parameters:**

*string* \$name

*mixed* \$value

Definition at line 125 of file view.php.

## 6.26.4 Member Data Documentation

### 6.26.4.1 `Galleria_View::$_render` [protected]

Definition at line 28 of file `view.php`.

### 6.26.4.2 `Galleria_View::$_layout` [protected]

Definition at line 32 of file `view.php`.

### 6.26.4.3 `Galleria_View::$_variables` [protected]

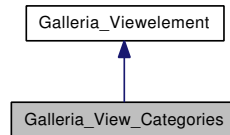

Definition at line 36 of file `view.php`.

The documentation for this class was generated from the following file:

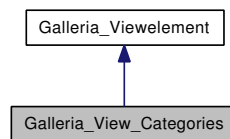

- `/var/www/galleria/data/lib/view.php`

## 6.27 Galleria\_View\_Categories Class Reference

Inheritance diagram for Galleria\_View\_Categories:

Collaboration diagram for Galleria\_View\_Categories:

### Static Public Member Functions

- static **info** (\$cat)
- static **ulList** (\$cats)
- static **adminList** (\$cats, \$class=null)

#### 6.27.1 Detailed Description

Definition at line 19 of file categories.php.

#### 6.27.2 Member Function Documentation

##### 6.27.2.1 static Galleria\_View\_Categories.info (\$ cat) [static]

Category info.

This function returns information about category. public

##### Parameters:

*Galleria\_Element\_Category* (p. 59) \$cat

##### Returns:

string

Definition at line 31 of file categories.php.

##### 6.27.2.2 static Galleria\_View\_Categories.ulList (\$ cats) [static]

Category list.

This function returns unordered list about categories. public

**Parameters:**

*Galleria\_Element\_Category* (p. 59)

**Returns:**

string

Definition at line 47 of file categories.php.

**6.27.2.3 static Galleria\_View\_Categories.adminList (\$ cats, \$ class = null) [static]**

Category admin list.

This function returns unordered list about categories for administrators. public

**Parameters:**

*Galleria\_Element\_Category* (p. 59)

**Returns:**

string

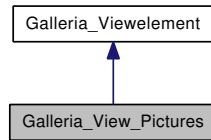

Definition at line 69 of file categories.php.

The documentation for this class was generated from the following file:

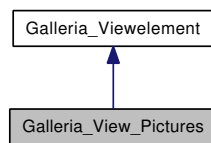

- /var/www/galleria/data/lib/view/**categories.php**

## 6.28 Galleria\_View\_Pictures Class Reference

Inheritance diagram for Galleria\_View\_Pictures:

Collaboration diagram for Galleria\_View\_Pictures:

### Static Public Member Functions

- static **info** (\$pics)
- static **format** (Galleria\_Image\_Object \$imgObj)

#### 6.28.1 Detailed Description

Definition at line 19 of file pictures.php.

#### 6.28.2 Member Function Documentation

##### 6.28.2.1 static Galleria\_View\_Pictures.info (\$pics) [static]

Picture info.

This function return picture information. public

##### Parameters:

*array* \$pics

##### Returns:

string

Definition at line 31 of file pictures.php.

##### 6.28.2.2 static Galleria\_View\_Pictures.format (Galleria\_Image\_Object \$imgObj) [static]

Format image.

This function formats image. public

**Parameters:**

*Galleria\_Image\_Object* (p. 69) \$imgObj

**Returns:**

string

Definition at line 49 of file pictures.php.

References `Galleria_Image_Object.isShown()`.

Here is the call graph for this function:

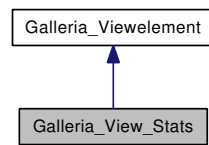

The documentation for this class was generated from the following file:

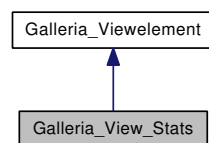

- `/var/www/galleria/data/lib/view/pictures.php`

## 6.29 Galleria\_View\_Stats Class Reference

Inheritance diagram for Galleria\_View\_Stats:

Collaboration diagram for Galleria\_View\_Stats:

### Static Public Member Functions

- static **info** (stdClass \$statObj)

### Static Protected Member Functions

- static **\_format** (\$count)

#### 6.29.1 Detailed Description

Definition at line 19 of file stats.php.

#### 6.29.2 Member Function Documentation

##### 6.29.2.1 static Galleria\_View\_Stats.info (stdClass \$ *statObj*) [static]

Stats info.

This function returns statistic informations. public

##### Parameters:

*stdClass* \$statObj

##### Returns:

string

Definition at line 31 of file stats.php.

**6.29.2.2 static Galleria\_View\_Stats.\_format (\$ *count*)** [static, protected]

Format stats.

This function formats stats. private

**Parameters:**

*integet* \$count

**Returns:**

string

Definition at line 45 of file stats.php.

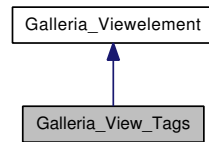

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/view/**stats.php**

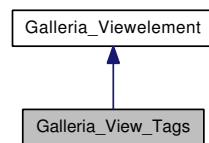

## 6.30 Galleria\_View\_Tags Class Reference

Inheritance diagram for Galleria\_View\_Tags:

Collaboration diagram for Galleria\_View\_Tags:

### Static Public Member Functions

- static **info** (\$tags)
- static **lists** (\$tags, \$pid)

### Static Private Member Functions

- static **\_calcSize** (\$weight, \$sum)

#### 6.30.1 Detailed Description

Definition at line 19 of file tags.php.

#### 6.30.2 Member Function Documentation

##### 6.30.2.1 static **Galleria\_View\_Tags.info** (\$ *tags*) [static]

Tags info.

This function returns information about tags. public

##### Parameters:

*array* \$tags

##### Returns:

string

Definition at line 31 of file tags.php.

### 6.30.2.2 static Galleria\_View\_Tags.lists (\$ tags, \$ pid) [static]

Tags list.

This function returns unordered list about tags. public

#### Parameters:

*array* \$tags

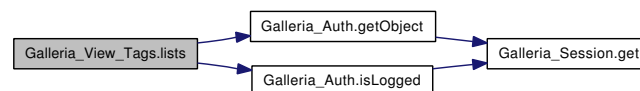

#### Returns:

string

Definition at line 49 of file tags.php.

References Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

### 6.30.2.3 static Galleria\_View\_Tags.\_calcSize (\$ weight, \$ sum) [static, private]

Calculate size.

This function calculates correct size of tag. private

#### Parameters:

*integer* \$weight

*integer* \$sum

#### Returns:

integer

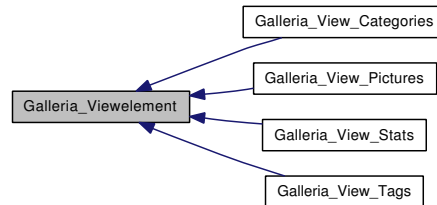

Definition at line 69 of file tags.php.

The documentation for this class was generated from the following file:

- /var/www/galleria/data/lib/view/**tags.php**

## 6.31 Galleria\_Viewelement Class Reference

Inheritance diagram for Galleria\_Viewelement:

### Static Public Member Functions

- static **init** (\$html)

### Static Protected Attributes

- static **\$\_http\_url**

#### 6.31.1 Detailed Description

Definition at line 19 of file viewelement.php.

#### 6.31.2 Member Function Documentation

##### 6.31.2.1 static Galleria\_Viewelement.init (\$html) [static]

Initialize html root.

This function initializes html root of view elements. public

##### Parameters:

*string* \$html

Definition at line 36 of file viewelement.php.

#### 6.31.3 Member Data Documentation

##### 6.31.3.1 Galleria\_Viewelement.\$\_http\_url [static, protected]

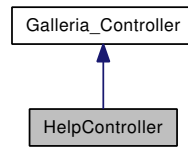

Definition at line 26 of file viewelement.php.

The documentation for this class was generated from the following file:

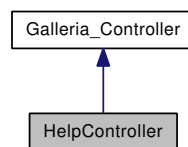

- /var/www/galleria/data/lib/**viewelement.php**

## 6.32 HelpController Class Reference

Inheritance diagram for HelpController:

Collaboration diagram for HelpController:

### Public Member Functions

- **indexAction ()**

#### 6.32.1 Detailed Description

Definition at line 19 of file helpcontroller.php.

#### 6.32.2 Member Function Documentation

##### 6.32.2.1 HelpController.indexAction ()

Index page.

Index page action. Sets up Help index page. public

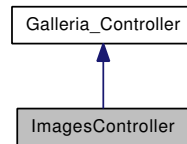

Definition at line 28 of file helpcontroller.php.

The documentation for this class was generated from the following file:

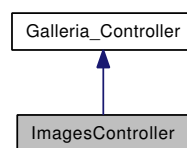

- /var/www/galleria/data/site/mvc/controller/**helpcontroller.php**

## 6.33 ImagesController Class Reference

Inheritance diagram for ImagesController:

Collaboration diagram for ImagesController:

### Public Member Functions

- `indexAction ()`
- `fileAction ()`

#### 6.33.1 Detailed Description

Definition at line 19 of file `imagescontroller.php`.

#### 6.33.2 Member Function Documentation

##### 6.33.2.1 ImagesController.indexAction ()

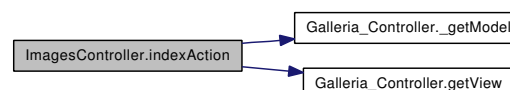

Index page.

Index page action. Sets up Image index page. public

Definition at line 28 of file `imagescontroller.php`.

References `Galleria_Controller._getModel()`, and `Galleria_Controller.getView()`.

Here is the call graph for this function:

##### 6.33.2.2 ImagesController.fileAction ()

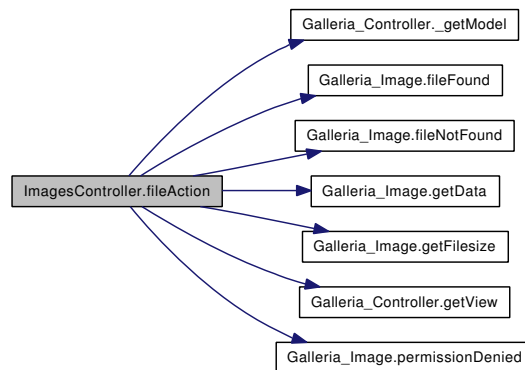

File page.

File page action. Sets up Image file page. public

Definition at line 44 of file imagescontroller.php.

References Galleria\_Controller.\_getModel(), Galleria\_Image.fileFound(), Galleria\_Image.fileNotFound(), Galleria\_Image.getData(), Galleria\_Image.getFilesize(), Galleria\_Controller.getView(), and Galleria\_Image.permissionDenied().

Here is the call graph for this function:

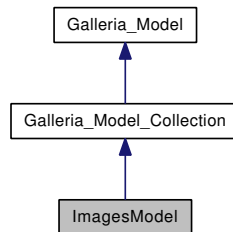

The documentation for this class was generated from the following file:

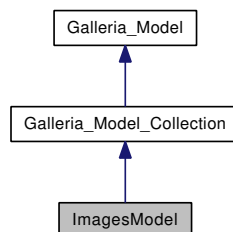

- `/var/www/galleria/data/site/mvc/controller/imagescontroller.php`

## 6.34 ImagesModel Class Reference

Inheritance diagram for ImagesModel:

Collaboration diagram for ImagesModel:

### Public Member Functions

- **getImageInfo** (\$pid)
- **getImageTags** (\$pid)
- **fileFound** (\$pid)
- **checkPermission** (\$pid)

#### 6.34.1 Detailed Description

Definition at line 19 of file imagesmodel.php.

#### 6.34.2 Member Function Documentation

##### 6.34.2.1 ImagesModel.getImageInfo (\$ pid)

Gives image info.

This function gets image information from database and returns it. public

##### Parameters:

*integer* \$pid

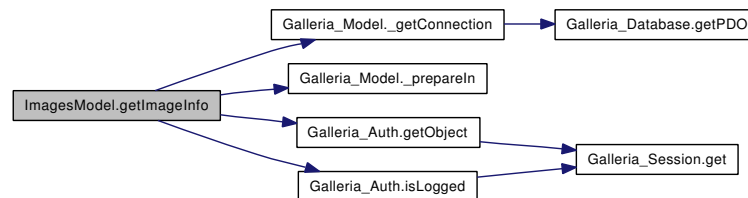

##### Returns:

**Galleria\_Image\_Object** (p. 69)

Definition at line 30 of file imagesmodel.php.

References Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

#### 6.34.2.2 ImagesModel.getImageTags (\$pid)

Gives image tags.

This function gets image related tags from database and retruns them. public

##### Parameters:

*integer* \$pid

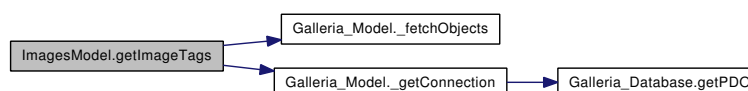

##### Returns:

array

Definition at line 57 of file imagesmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.34.2.3 ImagesModel.fileFound (\$pid)

Is file found?

This function checks if file is set in database. public

##### Parameters:

*integer* \$pid

##### Returns:

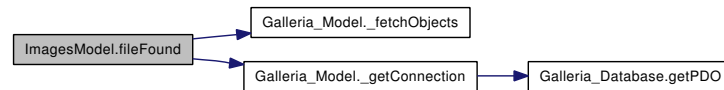

boolean

Definition at line 73 of file imagesmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.34.2.4 ImagesModel.checkPermission (\$pid)

Check permission.

This function checks if user has permission to see selected picture. public

##### Parameters:

*integer* \$pid

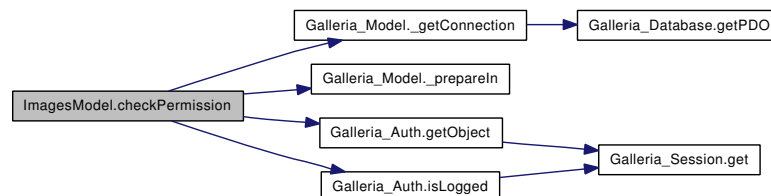

##### Returns:

boolean

Definition at line 89 of file imagesmodel.php.

References Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

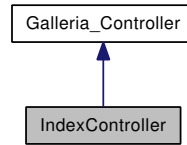

The documentation for this class was generated from the following file:

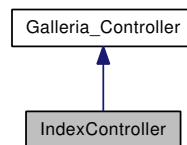

- /var/www/galleria/data/site/mvc/model/imagesmodel.php

## 6.35 IndexController Class Reference

Inheritance diagram for IndexController:

Collaboration diagram for IndexController:

### Public Member Functions

- **indexAction ()**

#### 6.35.1 Detailed Description

Definition at line 19 of file indexcontroller.php.

#### 6.35.2 Member Function Documentation

##### 6.35.2.1 IndexController.indexAction ()

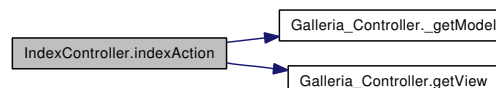

Index page.

Index page action. Sets up Index index page. public

Definition at line 28 of file indexcontroller.php.

References Galleria\_Controller.\_getModel(), and Galleria\_Controller.getView().

Here is the call graph for this function:

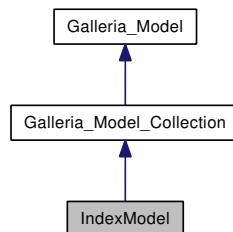

The documentation for this class was generated from the following file:

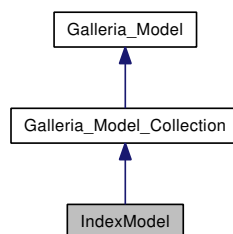

- /var/www/galleria/data/site/mvc/controller/**indexcontroller.php**

## 6.36 IndexModel Class Reference

Inheritance diagram for IndexModel:

Collaboration diagram for IndexModel:

### Public Member Functions

- `getLatestPictures ()`
- `getStats ()`

#### 6.36.1 Detailed Description

Definition at line 19 of file `indexmodel.php`.

#### 6.36.2 Member Function Documentation

##### 6.36.2.1 IndexModel.getLatestPictures ()

Give latest pictures.

This function gets latest pictures from database. public

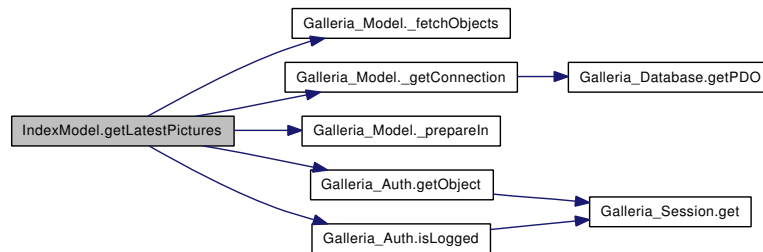

##### Returns:

array

Definition at line 29 of file `indexmodel.php`.

References `Galleria_Model._fetchObjects()`, `Galleria_Model._getConnection()`, `Galleria_Model._prepareIn()`, `Galleria_Auth.getObject()`, and `Galleria_Auth.isLogged()`.

Here is the call graph for this function:

### 6.36.2.2 IndexModel.getStats ()

Give stats.

This function gets some site relevant statistics. public

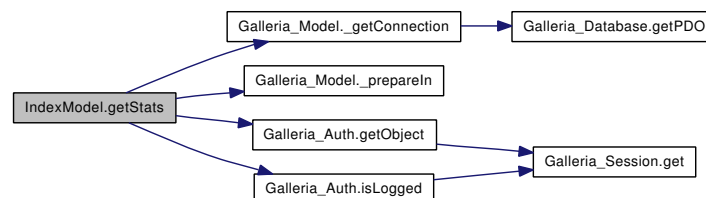

#### Returns:

stdClass

Definition at line 54 of file `indexmodel.php`.

References `Galleria_Model._getConnection()`, `Galleria_Model._prepareIn()`, `Galleria_Auth.getObject()`, and `Galleria_Auth.isLogged()`.

Here is the call graph for this function:

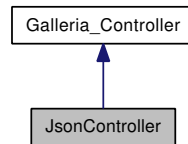

The documentation for this class was generated from the following file:

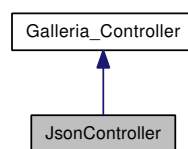

- `/var/www/galleria/data/site/mvc/model/indexmodel.php`

## 6.37 JsonController Class Reference

Inheritance diagram for JsonController:

Collaboration diagram for JsonController:

### Public Member Functions

- `indexAction ()`
- `getAction ()`
- `postAction ()`
- `before ()`

### Private Member Functions

- `_parseCatGroups ($data)`
- `_parseCatsToArray ($cats, $parent=null)`

#### 6.37.1 Detailed Description

Definition at line 19 of file `jsoncontroller.php`.

#### 6.37.2 Member Function Documentation

##### 6.37.2.1 `JsonController.indexAction ()`

Index page.

Index page action. Sets up Json index page. public

Definition at line 28 of file `jsoncontroller.php`.

References `Galleria_Controller.getView()`.

Here is the call graph for this function:

### 6.37.2.2 JsonController.getAction ()

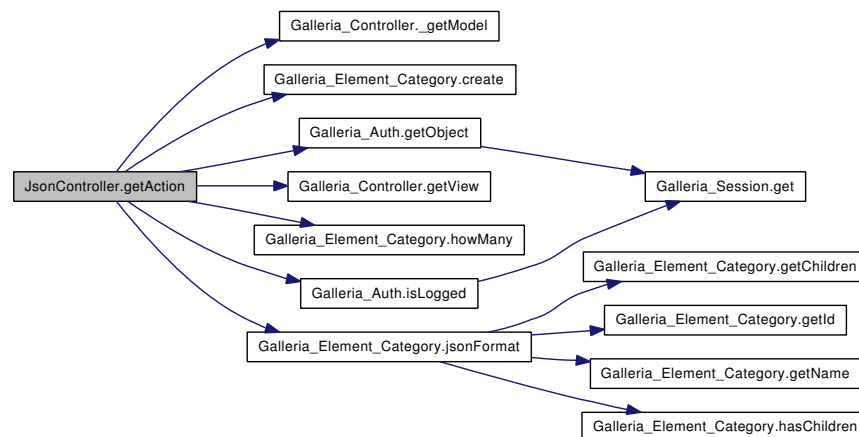

Get page.

Get page action. Handles all get requests. public

Definition at line 48 of file jsoncontroller.php.

References `Galleria_Controller._getModel()`, `Galleria_Element_Category.create()`, `Galleria_Auth.getObject()`, `Galleria_Controller.getView()`, `Galleria_Element_Category.howMany()`, `Galleria_Auth.isLogged()`, and `Galleria_Element_Category.jsonFormat()`.

Here is the call graph for this function:

### 6.37.2.3 JsonController.postAction ()

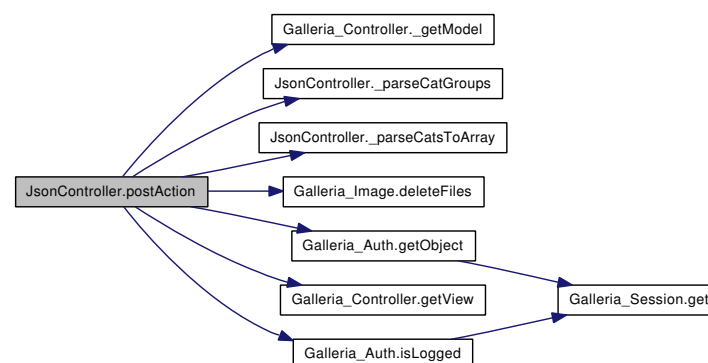

Post page.

Post page action. Handles all post requests. public

Definition at line 116 of file jsoncontroller.php.

References `Galleria_Controller._getModel()`, `_parseCatGroups()`, `_parseCatsToArray()`, `Galleria_Image.deleteFiles()`, `Galleria_Auth.getObject()`, `Galleria_Controller.getView()`, and `Galleria_Auth.isLogged()`.

Here is the call graph for this function:

#### 6.37.2.4 JsonController.before ()

Do before.

Does these things before any action. Unsets layout rendering. public

Reimplemented from **Galleria\_Controller** (p. 54).

Definition at line 177 of file jsoncontroller.php.

References Galleria\_Controller.getView().

Here is the call graph for this function:

#### 6.37.2.5 JsonController.\_parseCatGroups (\$ data) [private]

Parse category groups.

This function parses groups for categories. private

##### Parameters:

*string* \$data (p. 9)

##### Returns:

array

Definition at line 191 of file jsoncontroller.php.

Referenced by postAction().

#### 6.37.2.6 JsonController.\_parseCatsToArray (\$ cats, \$ parent = null) [private]

Parse Cats 2 Array.

This function parses categories to array. private

##### Parameters:

*array* \$cats

*integer* \$parent

##### Returns:

array

Definition at line 209 of file jsoncontroller.php.

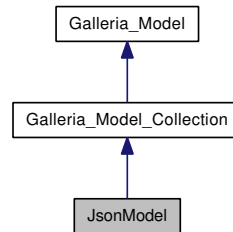

Referenced by postAction().

The documentation for this class was generated from the following file:

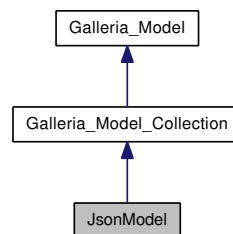

- /var/www/galleria/data/site/mvc/controller/jsoncontroller.php

## 6.38 JsonModel Class Reference

Inheritance diagram for JsonModel:

Collaboration diagram for JsonModel:

### Public Member Functions

- **deleteUser** (\$uid)
- **userActivity** (\$uid, \$act)
- **addUserInGroup** (\$uid, \$gid)
- **delUserInGroup** (\$uid, \$gid)
- **getGroupsFromUser** (\$uid, \$involves=true)
- **saveCatGroups** (\$groups, \$catid)
- **groupAdmin** (\$gid, \$admin)
- **deleteGroup** (\$gid)
- **saveCats** (\$cats)
- **addCat** (\$name)
- **deleteCat** (\$id)
- **getGroupsFromCat** (\$cid)
- **changeDesc** (\$pid, \$text)
- **changePg** (\$pid, \$text)
- **changeYear** (\$pid, \$text)
- **changeCat** (\$pid, \$cid)
- **addTag** (\$pid, \$name)
- **pictureVisibility** (\$pid, \$show)
- **deletePicTag** (\$pid, \$tid)
- **deletePic** (\$pid)
- **getChangelog** (\$pid)
- **getPgs** ()

## Private Member Functions

- `_catsToSqlString` (\$cat)
- `_groupsToSqlString` (\$catid, \$groupid)
- `_addNewTag` (\$name)
- `_getTagId` (\$name)
- `_deleteEmptyTags` ()

### 6.38.1 Detailed Description

Definition at line 19 of file jsonmodel.php.

### 6.38.2 Member Function Documentation

#### 6.38.2.1 `JsonModel.deleteUser` (\$ uid)

Delete user.

This function deletes user. public

##### Parameters:

*integer* \$uid

##### Returns:

boolean

Definition at line 32 of file jsonmodel.php.

References `Galleria_Model._getConnection()`.

Here is the call graph for this function:

#### 6.38.2.2 `JsonModel.userActivity` (\$ uid, \$ act)

Change user activity.

This function grants and removes active status from user. public

##### Parameters:

*integer* \$uid

*boolean* \$act

##### Returns:

stdClass

Definition at line 48 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.3 JsonModel.addUserInGroup (\$ uid, \$ gid)

Add user in group.

This function adds user in group. public

#### Parameters:

*integer* \$uid

*integer* \$gid

#### Returns:

boolean

Definition at line 67 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.4 JsonModel.delUserInGroup (\$ uid, \$ gid)

Delete user from group.

This function deletes user from group. public

#### Parameters:

*integer* \$uid

*integer* \$gid

#### Returns:

boolean

Definition at line 83 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.5 JsonModel.getGroupsFromUser (\$ uid, \$ involves = true)

Give groups form user.

This function returns groups where user is in. public

#### Parameters:

*integer* \$uid

*boolean* \$involves

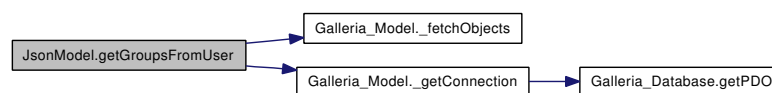

#### Returns:

array

Definition at line 99 of file jsonmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.6 JsonModel.saveCatGroups (\$ groups, \$ catid)

Save category groups.

This function clears and adds new groups for category. public

#### Parameters:

*array* \$groups

*integer* \$catid

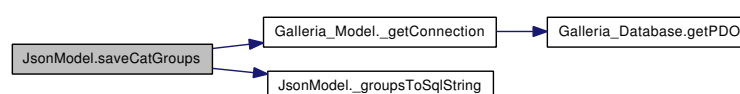

#### Returns:

boolean

Definition at line 119 of file jsonmodel.php.

References Galleria\_Model.\_getConnection(), and \_groupsToSqlString().

Here is the call graph for this function:

### 6.38.2.7 JsonModel.groupAdmin (\$ gid, \$ admin)

Toggle admin status.

This function grants and removes admin status from group. public

#### Parameters:

*integer* \$gid  
*boolean* \$admin

#### Returns:

stdClass

Definition at line 143 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.8 JsonModel.deleteGroup (\$ gid)

Delete group.

This function deletes group. public

#### Parameters:

*integer* \$gid

#### Returns:

boolean

Definition at line 161 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.9 JsonModel.saveCats (\$ cats)

Saves categories.

This function saves the categories hierarchy. public

#### Parameters:

*array* \$cats

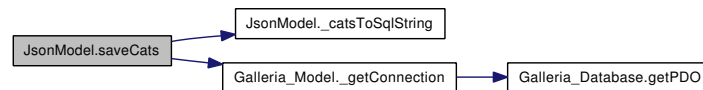

**Returns:**

boolean

Definition at line 178 of file jsonmodel.php.

References `_catsToSqlString()`, and `Galleria_Model._getConnection()`.

Here is the call graph for this function:

**6.38.2.10 JsonModel.addCat (\$ name)**

Add category.

This function creates category. public

**Parameters:**

*string* \$name

**Returns:**

boolean

Definition at line 199 of file jsonmodel.php.

References `Galleria_Model._getConnection()`.

Here is the call graph for this function:

**6.38.2.11 JsonModel.deleteCat (\$ id)**

Delete category.

This function deletes category. public

**Parameters:**

*integer* \$id

**Returns:**

boolean

Definition at line 214 of file jsonmodel.php.

References `Galleria_Model._getConnection()`.

Here is the call graph for this function:

#### 6.38.2.12 JsonModel.getGroupsFromCat (\$ cid)

Gives category related groups.

This function group **data** (p. 9), which is related to specific category id. public

##### Parameters:

*integer* \$cid

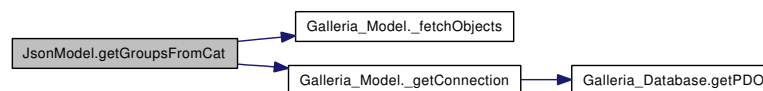

##### Returns:

array

Definition at line 229 of file jsonmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.38.2.13 JsonModel.\_catsToSqlString (\$ cat) [private]

Category SQL string.

This function creates SQL string for category update. private

##### Parameters:

*stdClass* \$cat

##### Returns:

boolean

Definition at line 245 of file jsonmodel.php.

Referenced by saveCats().

#### 6.38.2.14 JsonModel.\_groupsToSqlString (\$ catid, \$ groupid) [private]

Format category groups.

This function format category id and groups id to categorygroups query. private

**Parameters:***integer* \$catid*integer* \$groupid return stdClass

Definition at line 262 of file jsonmodel.php.

Referenced by saveCatGroups().

**6.38.2.15 JsonModel.changeDesc (\$pid, \$text)**

Change description.

This function changes description of picture. public

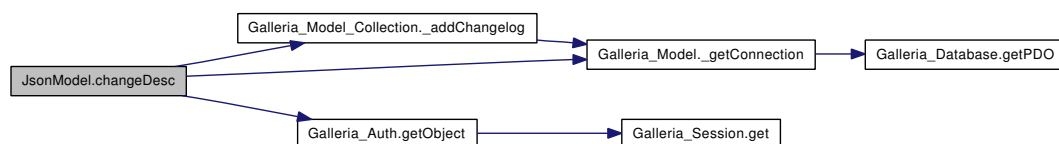

**Parameters:***integer* \$pid*string* \$text**Returns:**

boolean

Definition at line 281 of file jsonmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), Galleria\_Model.\_getConnection(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

**6.38.2.16 JsonModel.changePg (\$pid, \$text)**

Change photographer.

This function changes photographer of picture. public

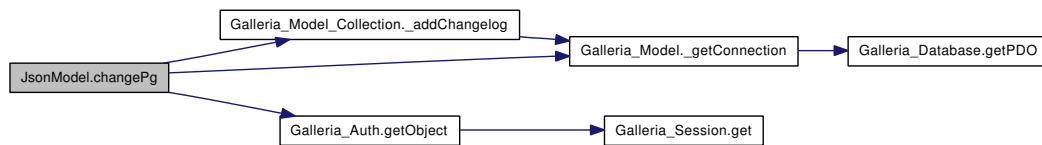

**Parameters:***integer* \$pid*string* \$text**Returns:**

boolean

Definition at line 297 of file jsonmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), Galleria\_Model.\_getConnection(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

#### 6.38.2.17 JsonModel.changeYear (\$pid, \$text)

Change year.

This function changes year of picture. public

##### Parameters:

*integer* \$pid

*string* \$text

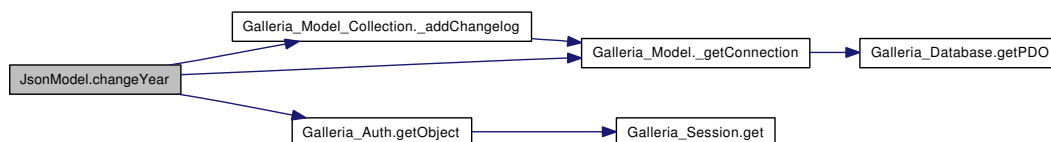

##### Returns:

boolean

Definition at line 313 of file jsonmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), Galleria\_Model.\_getConnection(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

#### 6.38.2.18 JsonModel.changeCat (\$pid, \$cid)

Change category.

This function changes category for picture. public

##### Parameters:

*integer* \$pid

*integer* \$cid

##### Returns:

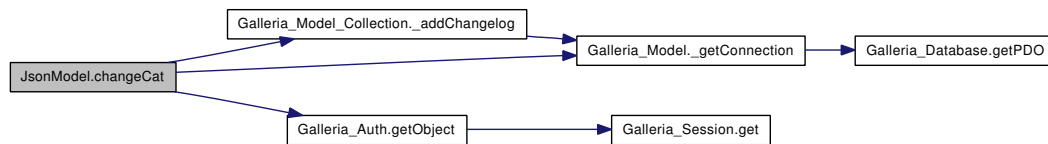

boolean

Definition at line 329 of file jsonmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), Galleria\_Model.\_getConnection(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

### 6.38.2.19 JsonModel.addTag (\$ pid, \$ name)

Add tag.

This function adds specific named tag to picture and creates tag if it doesn't already exists. public

#### Parameters:

*integer* \$pid

*string* \$name

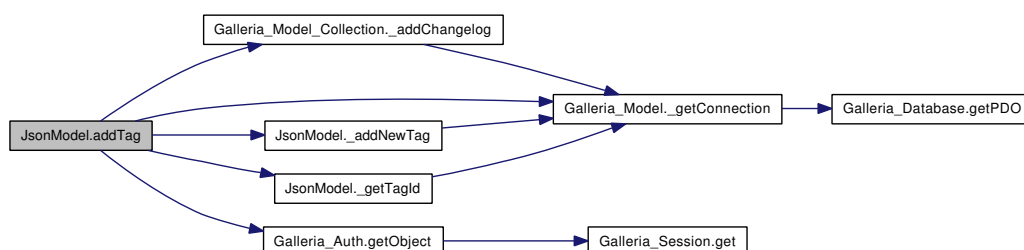

#### Returns:

integer|null

Definition at line 346 of file jsonmodel.php.

References Galleria\_Model\_Collection.\_addChangelog(), \_addNewTag(), Galleria\_Model.\_getConnection(), \_getTagId(), and Galleria\_Auth.getObject().

Here is the call graph for this function:

### 6.38.2.20 JsonModel.\_addNewTag (\$ name) [private]

Creates new tag.

This function creates tag for specified name of tag. private

#### Parameters:

*string* \$name

**Returns:**

integer|null

Definition at line 363 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Referenced by addTag().

Here is the call graph for this function:

**6.38.2.21 JsonModel.\_getTagId (\$ name) [private]**

Gives tag id.

This function return tag id, which belongs to specific name of tag. private

**Parameters:**

*string* \$name

**Returns:**

integer|null

Definition at line 378 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Referenced by addTag().

Here is the call graph for this function:

**6.38.2.22 JsonModel.pictureVisibility (\$ pid, \$ show)**

Toggle picture shown.

This function changes picture visibility between shown and hidden. public

**Parameters:**

*integer* \$pid

*boolean* \$show

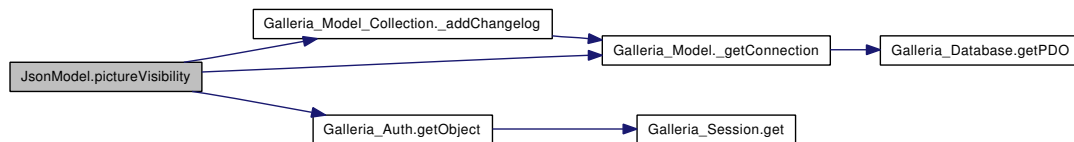

**Returns:**

boolean

Definition at line 394 of file jsonmodel.php.

References `Galleria_Model_Collection._addChangelog()`, `Galleria_Model._getConnection()`, and `Galleria_Auth.getObject()`.

Here is the call graph for this function:

### 6.38.2.23 `JsonModel.deletePicTag ($pid, $tid)`

Delete picture tag.

This function deletes tag from picture and if there are no relation assigned to tag, it will be removed.  
public

#### Parameters:

*integer* \$pid

*integer* \$tid

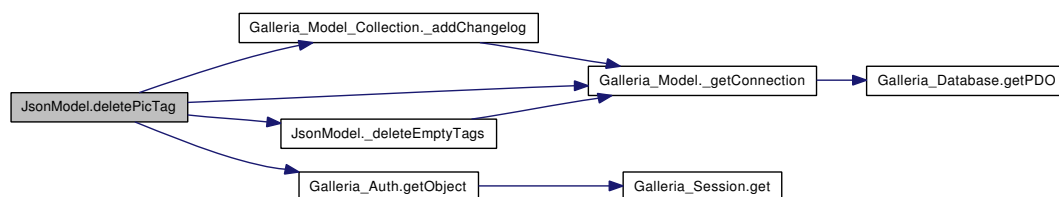

#### Returns:

boolean

Definition at line 415 of file jsonmodel.php.

References `Galleria_Model_Collection._addChangelog()`, `_deleteEmptyTags()`, `Galleria_Model._getConnection()`, and `Galleria_Auth.getObject()`.

Here is the call graph for this function:

### 6.38.2.24 `JsonModel._deleteEmptyTags ()` [private]

Delete empty tags.

This function deletes empty tags from database. private

#### Returns:

boolean

Definition at line 437 of file jsonmodel.php.

References Galleria\_Model.\_getConnection().

Referenced by deletePic(), and deletePicTag().

Here is the call graph for this function:

### 6.38.2.25 JsonModel.deletePic (\$ pid)

Delete picture.

This function deleted picture. public

#### Parameters:

*integer* \$pid

#### Returns:

boolean

Definition at line 452 of file jsonmodel.php.

References \_deleteEmptyTags(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.26 JsonModel.getChangelog (\$ pid)

Gives changelog.

This function returns changelog for specified picture. public

#### Parameters:

*integer* \$pid

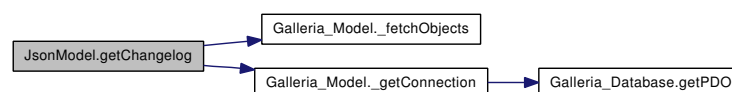

#### Returns:

array

Definition at line 467 of file jsonmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

### 6.38.2.27 JsonModel.getPgs ()

Gives changelog.

This function returns changelog for specified picture. public

#### Parameters:

*integer* \$pid

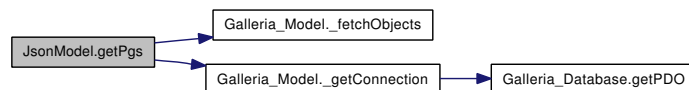

#### Returns:

array

Definition at line 483 of file jsonmodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

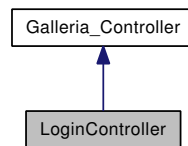

The documentation for this class was generated from the following file:

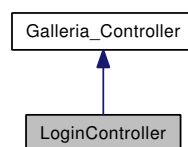

- `/var/www/galleria/data/site/mvc/model/jsonmodel.php`

## 6.39 LoginController Class Reference

Inheritance diagram for LoginController:

Collaboration diagram for LoginController:

### Public Member Functions

- `indexAction ()`
- `outAction ()`
- `before ()`

### 6.39.1 Detailed Description

Definition at line 19 of file logincontroller.php.

### 6.39.2 Member Function Documentation

#### 6.39.2.1 LoginController.indexAction ()

Index page.

Index page action. Sets up Login index page. public

Definition at line 28 of file logincontroller.php.

#### 6.39.2.2 LoginController.outAction ()

Out page.

Out page action. Logs out. public

Definition at line 49 of file logincontroller.php.

References Galleria\_Auth.logout().

Here is the call graph for this function:

### 6.39.2.3 LoginController.before ()

Do before.

Does before any action.

Reimplemented from **Galleria\_Controller** (p. 54).

Definition at line 60 of file `logincontroller.php`.

References `Galleria_Auth.isLogged()`.

Here is the call graph for this function:

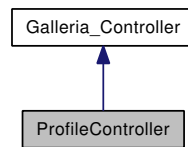

The documentation for this class was generated from the following file:

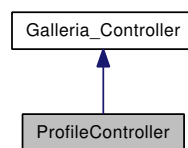

- `/var/www/galleria/data/site/mvc/controller/logincontroller.php`

## 6.40 ProfileController Class Reference

Inheritance diagram for ProfileController:

Collaboration diagram for ProfileController:

### Public Member Functions

- `indexAction ()`
- `before ()`

### 6.40.1 Detailed Description

Definition at line 19 of file `profilecontroller.php`.

### 6.40.2 Member Function Documentation

#### 6.40.2.1 ProfileController.indexAction ()

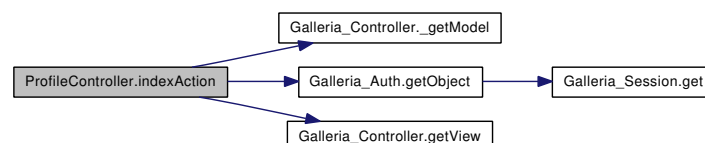

Profile page.

This gives profile page. public

Definition at line 28 of file `profilecontroller.php`.

References `Galleria_Controller._getModel()`, `Galleria_Auth.getObject()`, and `Galleria_Controller.getView()`.

Here is the call graph for this function:

### 6.40.2.2 ProfileController.before ()

Do this before.

This function checks if user is logged in to show his&hre profile. public

#### Returns:

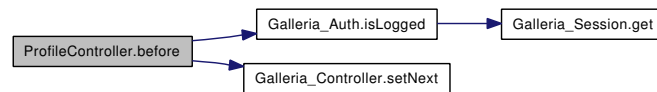

boolean

Reimplemented from **Galleria\_Controller** (p. 54).

Definition at line 47 of file profilecontroller.php.

References `Galleria_Auth.isLogged()`, and `Galleria_Controller.setNext()`.

Here is the call graph for this function:

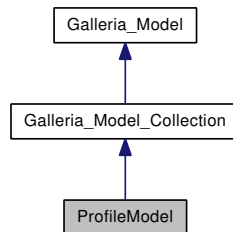

The documentation for this class was generated from the following file:

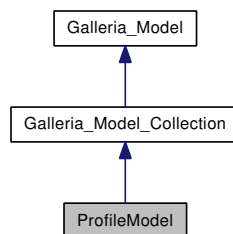

- `/var/www/galleria/data/site/mvc/controller/profilecontroller.php`

## 6.41 ProfileModel Class Reference

Inheritance diagram for ProfileModel:

Collaboration diagram for ProfileModel:

### Public Member Functions

- **changePw** (\$pw, \$uid)
- **getUserPics** (\$uid)

#### 6.41.1 Detailed Description

Definition at line 19 of file profilemodel.php.

#### 6.41.2 Member Function Documentation

##### 6.41.2.1 ProfileModel.changePw (\$pw, \$uid)

Change password.

This function changes password for specific user. public

##### Parameters:

*string* \$pw

*integer* \$uid

##### Returns:

boolean

Definition at line 31 of file profilemodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.41.2.2 ProfileModel.getUserPics (\$ uid)

Get pictures of user.

This function returns specific user related pictures. public

##### Parameters:

*integer* \$uid

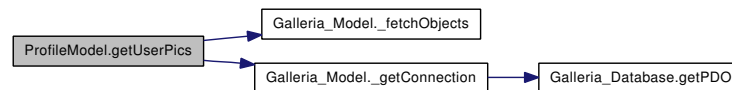

##### Returns:

array|boolean

Definition at line 46 of file profilemodel.php.

References Galleria\_Model.\_fetchObjects(), and Galleria\_Model.\_getConnection().

Here is the call graph for this function:

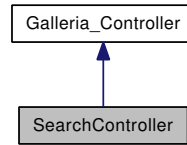

The documentation for this class was generated from the following file:

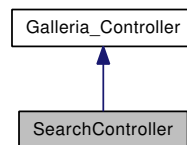

- /var/www/galleria/data/site/mvc/model/**profilemodel.php**

## 6.42 SearchController Class Reference

Inheritance diagram for SearchController:

Collaboration diagram for SearchController:

### Public Member Functions

- **indexAction ()**

#### 6.42.1 Detailed Description

Definition at line 19 of file searchcontroller.php.

#### 6.42.2 Member Function Documentation

##### 6.42.2.1 SearchController.indexAction ()

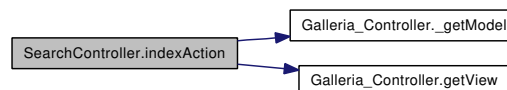

Index page.

Index page action. Sets up Search index page. public

Definition at line 28 of file searchcontroller.php.

References Galleria\_Controller.\_getModel(), and Galleria\_Controller.getView().

Here is the call graph for this function:

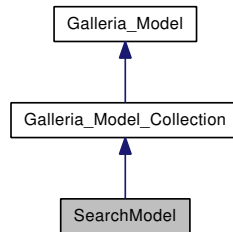

The documentation for this class was generated from the following file:

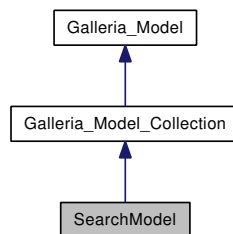

- `/var/www/galleria/data/site/mvc/controller/searchcontroller.php`

## 6.43 SearchModel Class Reference

Inheritance diagram for SearchModel:

Collaboration diagram for SearchModel:

### 6.43.1 Detailed Description

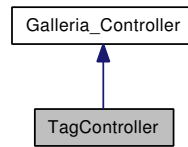

Definition at line 19 of file searchmodel.php.

The documentation for this class was generated from the following file:

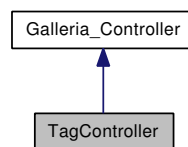

- `/var/www/galleria/data/site/mvc/model/searchmodel.php`

## 6.44 TagController Class Reference

Inheritance diagram for TagController:

Collaboration diagram for TagController:

### Public Member Functions

- `indexAction ()`

#### 6.44.1 Detailed Description

Definition at line 19 of file tagcontroller.php.

#### 6.44.2 Member Function Documentation

##### 6.44.2.1 TagController.indexAction ()

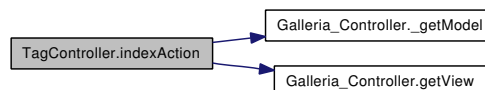

Index page.

Index page action. Sets up Tag index page. public

Definition at line 28 of file tagcontroller.php.

References `Galleria_Controller._getModel()`, and `Galleria_Controller.getView()`.

Here is the call graph for this function:

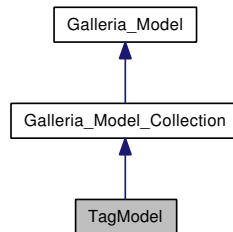

The documentation for this class was generated from the following file:

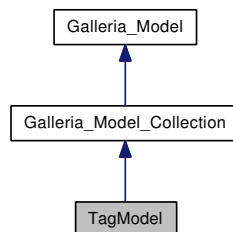

- `/var/www/galleria/data/site/mvc/controller/tagcontroller.php`

## 6.45 TagModel Class Reference

Inheritance diagram for TagModel:

Collaboration diagram for TagModel:

### Public Member Functions

- **getTagName** (\$tagid)
- **getPics** (\$tagid)

#### 6.45.1 Detailed Description

Definition at line 19 of file tagmodel.php.

#### 6.45.2 Member Function Documentation

##### 6.45.2.1 TagModel.getTagName (\$ tagid)

Gives name of tag.

This function gets name of specific tag from database. public

##### Parameters:

*integer* \$tagid

##### Returns:

string

Definition at line 30 of file tagmodel.php.

References Galleria\_Model.\_getConnection().

Here is the call graph for this function:

#### 6.45.2.2 TagModel.getPics (\$tagid)

Gives pictures.

This function gets pictures from database according specified tag id. public

##### Parameters:

*integer* \$tagid

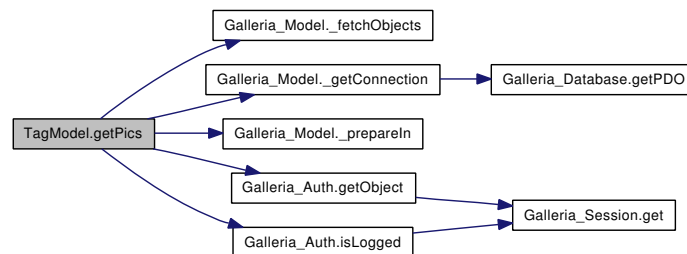

##### Returns:

array

Definition at line 46 of file tagmodel.php.

References Galleria\_Model.\_fetchObjects(), Galleria\_Model.\_getConnection(), Galleria\_Model.\_prepareIn(), Galleria\_Auth.getObject(), and Galleria\_Auth.isLogged().

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- /var/www/galleria/data/site/mvc/model/tagmodel.php
