

AdminController.before

```
graph LR; A[AdminController.before] --> B[Galleria_Auth.getObject]; A --> C[Galleria_Auth.isLogged]; A --> D[Galleria_Controller.setNext]; B --> E[Galleria_Session.get]; C --> E;
```

The diagram illustrates a sequence of method calls. It begins with a grey box labeled 'AdminController.before'. From this box, three arrows point to three separate white boxes: 'Galleria_Auth.getObject' (top), 'Galleria_Auth.isLogged' (middle), and 'Galleria_Controller.setNext' (bottom). From the 'Galleria_Auth.getObject' box, an arrow points to the 'Galleria_Session.get' box. Similarly, an arrow points from the 'Galleria_Auth.isLogged' box to the 'Galleria_Session.get' box. The 'Galleria_Session.get' box is the final destination in this sequence.

Galleria_Auth.getObject

Galleria_Auth.isLogged

Galleria_Controller.setNext

Galleria_Session.get
